## INTRODUCTION

Doing Business sheds light on how easy or difficult it is for a local entrepreneur to open and run a small to medium-size business when complying with relevant regulations. It measures and tracks changes in regulations affecting 11 areas in the life cycle of a business: starting a business, dealing with construction permits, getting electricity, registering property, getting credit, protecting minority investors, paying taxes, trading across borders, enforcing contracts, resolving insolvency and labor market regulation.

In a series of annual reports *Doing Business* presents quantitative indicators on business regulations and the protection of property rights that can be compared across 189 economies, from Afghanistan to Zimbabwe, over time. The data set covers 47 economies in Sub-Saharan Africa, 32 in Latin America and the Caribbean, 25 in East Asia and the Pacific, 26 in Eastern Europe and Central Asia, 20 in the Middle East and North Africa and 8 in South Asia, as well as 31 OECD high-income economies. The indicators are used to analyze economic outcomes and identify what reforms have worked, where and why.

This economy profile presents the *Doing Business* indicators for Bulgaria. To allow useful comparison, it also provides data for other selected economies (comparator economies) for each indicator. The data in this report are current as of June

1, 2014 (except for the paying taxes indicators, which cover the period January–December 2013).

The Doing Business methodology has limitations. Other areas important to business—such as an economy's proximity to large markets, the quality of its infrastructure services (other than those related to trading across borders and getting electricity), the security of property from theft and looting, the transparency government procurement, macroeconomic conditions or the underlying strength of institutions—are not directly studied by *Doing Business*. The indicators refer to a specific type of business, generally a local limited liability company operating in the largest business city. Because standard assumptions are used in the data collection, comparisons and benchmarks are valid across economies. The data not only highlight the extent of obstacles to doing business; they also help identify the source of those obstacles, supporting policy makers in designing regulatory reform.

More information is available in the full report. *Doing Business 2015* presents the indicators, analyzes their relationship with economic outcomes and presents business regulatory reforms. The data, along with information on ordering *Doing Business 2015*, are available on the *Doing Business* website at http://www.doingbusiness.org.

#### CHANGES IN DOING BUSINESS 2015

As part of a 2-year update in methodology, Doing Business 2015 incorporates 7 important changes. First, the ease of doing business ranking as well as all topiclevel rankings are now computed on the basis of distance to frontier scores (see the chapter on the distance to frontier and ease of doing business ranking). Second, for the 11 economies with a population of more than 100 million, data for a second city have been added to the data set and the ranking calculation. These economies are Bangladesh, Brazil, China, India, Indonesia, Japan, Mexico, Nigeria, Pakistan, the Russian Federation and the United States. Third, for getting credit, the methodology has been revised for both the strength of legal rights index and the depth of credit information index. The number of points has been increased in both indices, from 10 to 12 for the strength of legal rights index and from 6 to 8 for the depth of credit information index. In addition, only credit bureaus and registries that cover at least 5% of the adult population can receive a score on the depth of credit information index.

Fourth, the name of the protecting investors indicator set has been changed to protecting minority investors to better reflect its scope—and the scope of the indicator set has been expanded to include shareholders' rights in corporate governance beyond related-party transactions. Fifth, the resolving insolvency indicator set has been expanded to include an index measuring the strength of the legal framework for insolvency. Sixth, the calculation of the distance to frontier score for paying taxes has been changed. The total tax rate component now enters the score in a nonlinear fashion, in an approach different from that used for all other indicators (see the chapter on the distance to frontier and ease of doing business ranking).

Finally, the name of the employing workers indicator set has been changed to labor market regulation, and the scope of this indicator set has also been changed. The indicators now focus on labor market regulation applying to the retail sector rather than the manufacturing sector, and their coverage has been expanded to include regulations on labor disputes and on benefits provided to workers. The labor market regulation indicators continue to be excluded from the aggregate distance to frontier score and ranking on the ease of doing business.

Beyond these changes there are 3 other updates in methodology. For paying taxes, the financial statement variables have been updated to be proportional to 2012 income per capita; previously they were proportional to 2005 income per capita. For enforcing contracts, the value of the claim is now set at twice the income per capita or \$5,000, whichever is greater. For dealing with construction permits, the cost of construction is now set at 50 times income per capita (before, the cost was assessed by the *Doing Business* respondents). In addition, this indicator set no longer includes the procedures for obtaining a landline telephone connection.

For more details on the changes, see the "What is changing in *Doing Business?*" chapter starting on page 24 of the *Doing Business 2015* report. For more details on the data and methodology, please see the "Data Notes" chapter starting on page 114 of the *Doing Business 2015* report. For more details on the distance to frontier metric, please see the "Distance to frontier and ease of doing business ranking" chapter in this profile.

For policy makers trying to improve their economy's regulatory environment for business, a good place to start is to find out how it compares with the regulatory environment in other economies. Doing Business provides an aggregate ranking on the ease of doing business based on indicator sets that measure and benchmark regulations applying to domestic small to medium-size businesses through their life cycle. Economies are ranked from 1 to 189 by the ease of doing business ranking. This year's report presents results for 2 aggregate measures: the distance to frontier score and the ease of doing business ranking. The ranking of economies is determined by sorting the aggregate distance to frontier (DTF) scores. The distance to frontier score benchmarks economies with respect to regulatory practice, showing the absolute distance to the best performance in each Doing Business indicator. An economy's distance to frontier score is indicated on a scale from 0 to 100, where 0 represents the worst performance and 100 the frontier. (See the chapter on the distance to frontier and ease of doing business). The 10 topics included in the ranking in Doing Business 2015: starting a business, dealing with construction permits, getting electricity, registering property, getting credit, protecting minority investors, paying taxes, trading across borders, enforcing contracts and resolving insolvency. The labor market regulation indicators (formerly employing workers) are not included in this year's aggregate ease of doing business ranking, but the data are presented in this year's economy profile.

The aggregate ranking on the ease of doing business benchmarks each economy's performance on the indicators against that of all other economies in the *Doing Business* sample (figure 1.1). While this ranking tells much about the business environment in an economy, it does not tell the whole story. The ranking on the ease of doing business, and the underlying indicators, do not measure all aspects of the business environment that matter to firms and investors or that affect the competitiveness of the economy. Still, a high ranking does mean that the government has created a regulatory environment conducive to operating a business.

#### **ECONOMY OVERVIEW**

Region: Europe & Central Asia

Income category: Upper middle income

Population: 7,265,115

GNI per capita (US\$): 7,030

DB2015 rank: 38

DB2014 rank: 36\*

Change in rank: -2

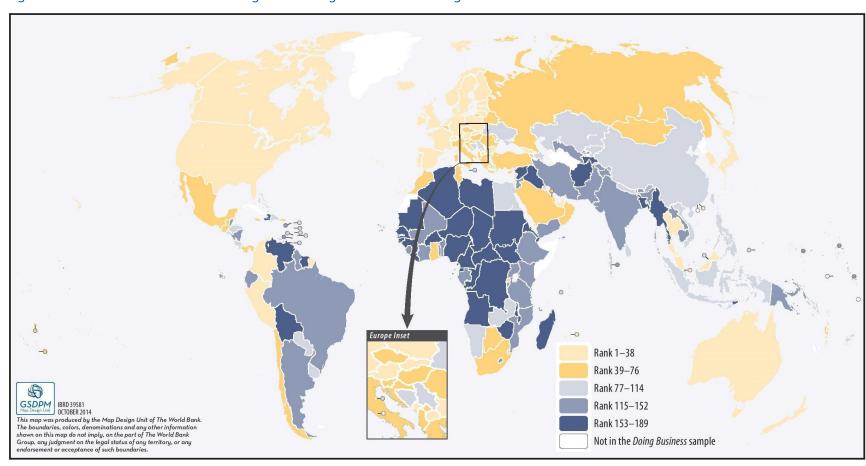

DB 2015 DTF: 71.8

DB 2014 DTF: 71.7

Change in DTF: 0.1

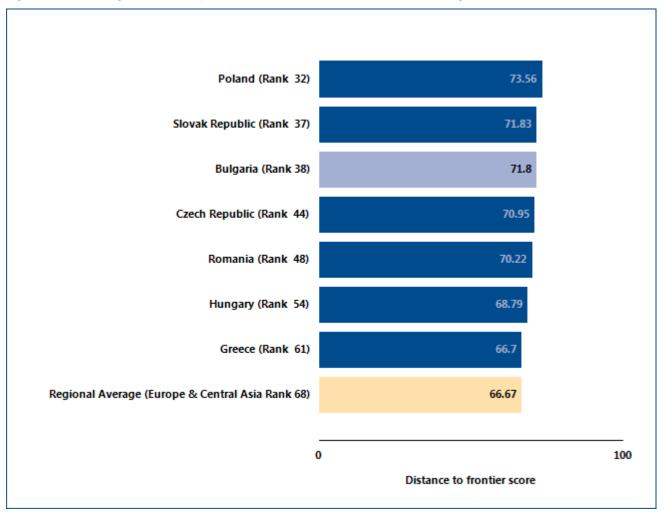

\* DB2014 ranking shown is not last year's published ranking but a comparable ranking for DB2014 that captures the effects of such factors as data corrections and the changes in methodology. See the data notes starting on page 114 of the *Doing Business 2015* report for sources and definitions.

Figure 1.1 Where economies stand in the global ranking on the ease of doing business

For policy makers, knowing where their economy stands in the aggregate ranking on the ease of doing business is useful. Also useful is to know how it ranks relative to comparator economies and relative to the regional average (figure 1.2). The economy's rankings (figure 1.3) and distance to frontier scores (figure 1.4) on the topics included in the ease of doing business ranking provide another perspective.

Note: The rankings are benchmarked to June 2014 and based on the average of each economy's distance to frontier (DTF) scores for the 10 topics included in this year's aggregate ranking. The distance to frontier score benchmarks economies with respect to regulatory practice, showing the absolute distance to the best performance in each *Doing Business* indicator. An economy's distance to frontier score is indicated on a scale from 0 to 100, where 0 represents the worst performance and 100 the frontier. For the economies for which the data cover 2 cities, scores are a population-weighted average for the 2 cities. *Source: Doing Business* database.

Figure 1.3 Rankings on *Doing Business* topics - Bulgaria

(Scale: Rank 189 center, Rank 1 outer edge)

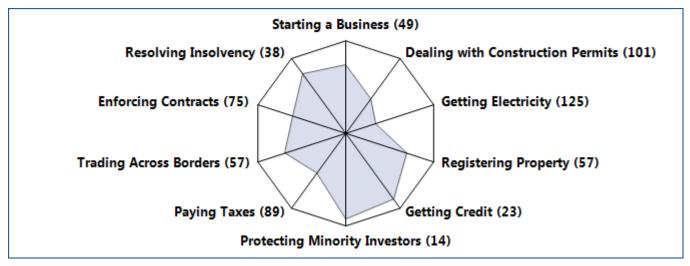

Figure 1.4 Distance to frontier scores on Doing Business topics - Bulgaria

(Scale: Score 0 center, Score 100 outer edge)

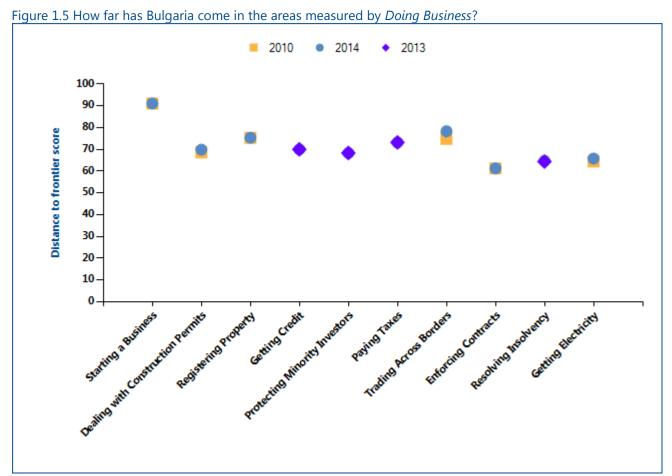

Note: The rankings are benchmarked to June 2014 and based on the average of each economy's distance to frontier (DTF) scores for the 10 topics included in this year's aggregate ranking. The distance to frontier score benchmarks economies with respect to regulatory practice, showing the absolute distance to the best performance in each *Doing Business* indicator. An economy's distance to frontier score is indicated on a scale from 0 to 100, where 0 represents the worst performance and 100 the frontier. For the economies for which the data cover 2 cities, scores are a population-weighted average for the 2 cities. *Source: Doing Business* database.

Just as the overall ranking on the ease of doing business tells Doing Business introduced the distance to frontier score. This only part of the story, so do changes in that ranking. Yearly movements in rankings can provide some indication of changes in an economy's regulatory environment for firms, but they are always relative.

Moreover, year-to-year changes in the overall rankings do not reflect how the business regulatory environment in an economy has changed over time—or how it has changed in different areas. To aid in assessing such changes, measure shows how far on average an economy is from the best performance achieved by any economy on each Doing Business indicator.

Comparing the measure for an economy at 2 points in time allows users to assess how much the economy's regulatory environment as measured by Doing Business has changed over time—how far it has moved toward (or away from) the most efficient practices and strongest regulations in areas covered by Doing Business (figure 1.5).

Note: The distance to frontier score shows how far on average an economy is from the best performance achieved by any economy on each Doing Business indicator since 2010, except for getting credit, paying taxes, protecting minority investors and resolving insolvency which had methodology changes in 2014 and thus are only comparable to 2013. The measure is normalized to range between 0 and 100, with 100 representing the best performance (the frontier). See the data notes starting on page 114 of the Doing Business 2015 report for more details on the distance to frontier score.

The absolute values of the indicators tell another part of the story (table 1.1). The indicators, on their own or in comparison with the indicators of a good practice economy or those of comparator economies in the region, may reveal bottlenecks reflected in large numbers of procedures, long delays or high costs. Or they may reveal unexpected strengths in an area of business

regulation—such as a regulatory process that can be completed with a small number of procedures in a few days and at a low cost. Comparison of the economy's indicators today with those in the previous year may show where substantial bottlenecks persist—and where they are diminishing.

Outcome (0 as piecemeal sale and 1 as going concern)	0	0	1	0	0	1	0	1	
Recovery rate (cents on the dollar)	33.2	32.5	65.6	34.3	40.2	57.0	30.7	54.4	Japan (92.9)
Strength of insolvency framework index (0-16)	15.0	15.0	13.5	12.0	9.0	12.5	13.5	13.0	5 Economies (15.0)*

Note: DB2014 rankings shown are not last year's published rankings but comparable rankings for DB2014 that capture the effects of such factors as data corrections and changes to the methodology. Trading across borders deflated and non-deflated values are identical in DB2015 because it is defined as the base year for the deflator. The best performer on time for paying taxes is defined as the lowest time recorded among all economies in the DB2015 sample that levy the 3 major taxes: profit tax, labor taxes and mandatory contributions, and VAT or sales tax. If an economy has no laws or regulations covering a specific area—for example, insolvency—it receives a "no practice" mark. Similarly, an economy receives a "no practice" or "not possible" mark if regulation exists but is never used in practice or if a competing regulation prohibits such practice. Either way, a "no practice" mark puts the economy at the bottom of the ranking on the relevant indicator.

<sup>\*</sup> Two or more economies share the top ranking on this indicator. A number shown in place of an economy's name indicates the number of economies that share the top ranking on the indicator. For a list of these economies, see the *Doing Business* website (http://www.doingbusiness.org).

Formal registration of companies has many immediate benefits for the companies and for business owners and employees. Legal entities can outlive their founders. Resources are pooled as several shareholders join forces to start a company. Formally registered companies have access to services and institutions from courts to banks as well as to new markets. And their employees can benefit from protections provided by the law. An additional benefit comes with limited liability companies. These limit the financial liability of company owners to their investments, so personal assets of the owners are not put at risk. Where governments make registration easy, more entrepreneurs start businesses in the formal sector, creating more good jobs and generating more revenue for the government.

#### What do the indicators cover?

Doing Business measures the ease of starting a business in an economy by recording all procedures officially required or commonly done in practice by an entrepreneur to start up and formally operate an industrial or commercial business—as well as the time and cost required to complete these procedures. It also records the paid-in minimum capital that companies must deposit before registration (or within 3 months). The ranking of economies on the ease of starting a business is determined by sorting their distance to frontier scores for starting a business. These scores are the simple average of the distance to frontier scores for each of the component indicators.

To make the data comparable across economies, *Doing Business* uses several assumptions about the business and the procedures. It assumes that all information is readily available to the entrepreneur and that there has been no prior contact with officials. It also assumes that the entrepreneur will pay no bribes. And it assumes that the business:

- Is a limited liability company, located in the largest business city and is 100% domestically owned<sup>1</sup>.
- Has between 10 and 50 employees.
- Conducts general commercial or industrial activities.

# WHAT THE STARTING A BUSINESS INDICATORS MEASURE

## Procedures to legally start and operate a company (number)

Preregistration (for example, name verification or reservation, notarization)

Registration in the economy's largest business city<sup>1</sup>

Postregistration (for example, social security registration, company seal)

# Time required to complete each procedure (calendar days)

Does not include time spent gathering information

Each procedure starts on a separate day (2 procedures cannot start on the same day). Procedures that can be fully completed online are recorded as ½ day.

Procedure completed once final document is received

No prior contact with officials

# Cost required to complete each procedure (% of income per capita)

Official costs only, no bribes

No professional fees unless services required by law

# Paid-in minimum capital (% of income per capita)

Deposited in a bank or with a notary before registration (or within 3 months)

- Has a start-up capital of 10 times income per capita.
- Has a turnover of at least 100 times income per capita.
- Does not qualify for any special benefits.
- Does not own real estate.

<sup>&</sup>lt;sup>1</sup> For the 11 economies with a population of more than 100 million, data for a second city have been added.

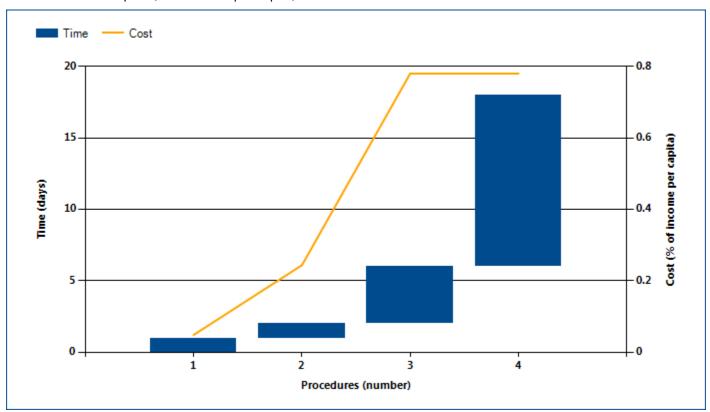

## Where does the economy stand today?

What does it take to start a business in Bulgaria? According to data collected by *Doing Business*, starting a business there requires 4.0 procedures, takes 18.0 days, costs 0.8% of income per capita and requires paid-in minimum capital of 0.0% of income per capita (figure 2.1). Most indicator sets refer to a case scenario in the

largest business city of an economy, except for 11 economies for which the data are a population-weighted average of the 2 largest business cities. See the chapter on distance to frontier and ease of doing business ranking at the end of this profile for more details.

Figure 2.1 What it takes to start a business in Bulgaria -

Paid-in minimum capital (% of income per capita): 0.0

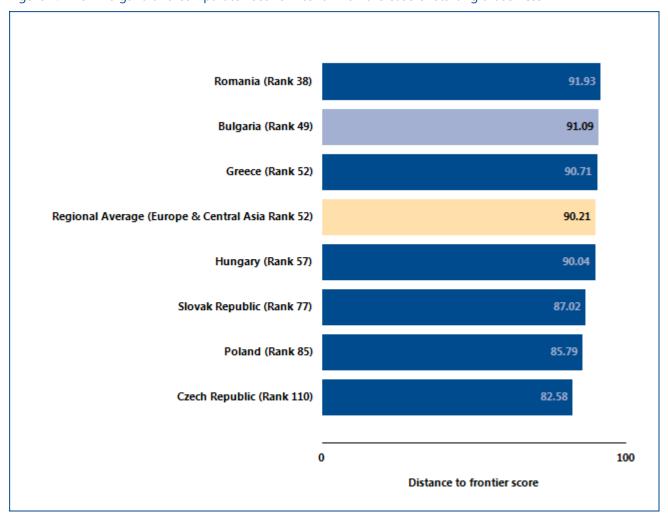

Note: Time shown in the figure above may not reflect simultaneity of procedures. Online procedures account for 0.5 days in the total time calculation. For more information on the methodology of the starting a business indicators, see the *Doing Business* website (http://www.doingbusiness.org). For details on the procedures reflected here, see the summary at the end of this chapter. *Source: Doing Business* database.

Globally, Bulgaria stands at 49 in the ranking of 189 economies on the ease of starting a business (figure 2.2). The rankings for comparator economies and the regional

average ranking provide other useful information for assessing how easy it is for an entrepreneur in Bulgaria to start a business.

Figure 2.2 How Bulgaria and comparator economies rank on the ease of starting a business

Economies around the world have taken steps making it easier to start a business—streamlining procedures by setting up a one-stop shop, making procedures simpler or faster by introducing technology and reducing or eliminating minimum capital requirements. Many have undertaken business registration reforms in stages—and

they often are part of a larger regulatory reform program. Among the benefits have been greater firm satisfaction and savings and more registered businesses, financial resources and job opportunities.

What business registration reforms has *Doing Business* recorded in Bulgaria (table 2.1)?

Table 2.1 How has Bulgaria made starting a business easier—or not? By *Doing Business* report year from DB2010 to DB2015

DB year	Reform
DB2010	Bulgaria made starting a business easier by reducing the paid- in minimum capital requirement and enhancing efficiency at the company registry.
DB2011	Bulgaria eased business start-up by reducing the minimum capital requirement from 5,000 leva (\$3,250) to 2 leva (\$1.30).
DB2013	Bulgaria made starting a business easier by reducing the cost of registration.
DB2015	Bulgaria made starting a business easier by lowering registration fees.

*Note:* For information on reforms in earlier years (back to DB2005), see the *Doing Business* reports for these years, available at http://www.doingbusiness.org.

#### What are the details?

Underlying the indicators shown in this chapter for Bulgaria is a set of specific procedures—the bureaucratic and legal steps that an entrepreneur must complete to incorporate and register a new firm. These are identified by Doing Business through collaboration with relevant local professionals and the study of laws, regulations and publicly available information on business entry in that economy. Following is a detailed summary of those procedures, along with the associated time and cost. These procedures are those that apply to a company matching the standard assumptions "standardized company") used by Doing Business in collecting the data (see the section in this chapter on what the indicators measure).

#### STANDARDIZED COMPANY

Legal form: Druzestvo s Ogranichena

Otgovornost (OOD)

Paid in minimum capital requirement: BGN 2

**City: Sofia** 

Start-up Capital: 10 times GNI per capita

Table 2.2 Summary of time, cost and procedures for starting a business in Bulgaria -

No.	Procedure	Time to complete	Cost to complete
	Execute the minutes of the constituent meeting of the shareholders in the OOD; obtain a notary certified statement of consent and signature specimen of the manager, and a certified copy of the articles of incorporation of the OOD.  Each newly appointed general manager must sign and submit the following affidavits:  (1) affidavit under Article 141 of the Commercial Act, where the general manager declares that (s)he has not been declared in bankruptcy and (s)he has not been a general manager, a member of a managing or	complete	
1	controlling body of a company, dissolved because of bankruptcy during the last two years preceding the date of the resolution declaring the bankruptcy, and that, in addition, (s)he has not been a general manager or a member of a managing or controlling body of a company, that has been ascertained by an effective and enforceable penalty decree as not complying with such company's obligations for establishment and storage of the determined levels of reserves under the Bulgarian Law on Reserves of Oil and Oil Products;	1 day	BGN 5
	(2) affidavit under Article 142 of the Commercial Act where the general manager declares that without the prior consent of the company (s)he will not (i) enter into commercial transactions either in his/her personal capacity or on behalf of third parties; (ii) participate in general partnerships, limited partnerships and limited liability companies; and (iii) occupy positions in the managing bodies of other partnerships or companies; and		
	(3) affidavit under Article 13 paragraph 4 of the Commercial Register		

No.	Procedure	Time to complete	Cost to complete
	Act to declare that the circumstances, as would be applied for registration in the Commercial Register and the adoption of the acts as would be applied for promulgation therein, are genuine and true.  Agency: Public Notary		
2	Deposit paid-up capital in a bank  The capital-accruing bank account must be opened either by the company manager or by a person authorized by a notary-certified power of attorney. Those persons delegated authority over the bank account must provide a signature specimen in person or a notary-certified specimen. The amount of capital stays blocked in the bank account until the registry issues a decision on the company registration. The Commercial Act requires the minimum capital prescribed by law, i.e. BGN 2, to be paid-in prior to incorporation. After opening the escrow account and depositing the funds therein the company under incorporation is issued a certificate evidencing the shareholders' deposit of the capital. The certificate must be presented at the registry.  Agency: Commercial Bank	1 day on average	BGN 10 -30 BGN (depending on the bank)
3	Register with the Commercial Register at the Registry Agency  The registration is done using a Standard Application (A4 Form –  "Application for registration of circumstances related to a limited liability company"). The following documents must be attached to the application: (1) Agreement of Association, (2) Resolution for appointment of manager(s), (3) Notary certified consent and signature specimen of manager(s), and (4) Bank certificate for deposited capital. The state fees are BGN 110 if the documents are filed with the Registry Agency on paper or BGN 80 if the registration documents are filed with the Registry Agency electronically.  The following affidavits by each of the appointed general managers of the company must also be attached to application A4: Affidavit under Article 141 paragraph 8 of the Commercial Act; Affidavit under Article 142 of the Commercial Act; and Affidavit under Article 13 paragraph 4 of the Commercial Register Act.  Agency: Registry Agency	4 days	BGN 55 for electronic registration and BGN 110 for hard copy application
4	Register for VAT  The Value Added Tax Act (promulgated on August 4, 2006 in State Gazette issue 63) became effective on January 1, 2007 (Bulgaria's EU accession date). Under this new law, the company may voluntarily register for VAT purposes at any time, because the current threshold requirement has been abolished. A voluntarily registered person shall	1 day (filing), about 12 days for final registration	no charge

No.	Procedure	Time to complete	Cost to complete
	remain VAT-registered for 24 months starting from the beginning of the year following the year of VAT registration. The company must register for VAT purposes in Bulgaria if its turnover for 12 consecutive months exceeds BGN 50,000.		
	Specific grounds for obligatory registration for VAT purposes apply when:		
	- A person from an EU member state who is not established in Bulgaria and provides taxable supplies of goods that are to be assembled or installed in Bulgaria by that person or at his or her expense (if the		
	recipient is not registered for VAT in Bulgaria).  - A person from another EU member state supplies goods to Bulgaria		
	exceeding total value of BGN 70,000 under the conditions of distance sales of goods within a given calendar year.		
	- A person (whether resident or not) performs taxable intra-community acquisitions in Bulgaria exceeding BGN 20,000 within a given calendar year.		
	- A person (whether resident or not) receives supplies of services under chargeable supplies having place of performance on Bulgarian territory		
	with respect to which the VAT is due by the recipient.  - A Bulgarian resident performing supplies of services having place of supply the territory of another EU member state.		
	Agency: Tax Authority		

<sup>\*</sup> Takes place simultaneously with another procedure.

*Note*: Online procedures account for 0.5 days in the total time calculation.

Regulation of construction is critical to protect the public. But it needs to be efficient, to avoid excessive constraints on a sector that plays an important part in every economy. Where complying with building regulations is excessively costly in time and money, many builders opt out. They may pay bribes to pass inspections or simply build illegally, leading to hazardous construction that puts public safety at risk. Where compliance is simple, straightforward and inexpensive, everyone is better off.

#### What do the indicators cover?

Doing Business records the procedures, time and cost for a business in the construction industry to obtain all the necessary approvals to build a warehouse in the economy's largest business city, connect it to basic utilities and register the warehouse so that it can be used as collateral or transferred to another entity.

The ranking of economies on the ease of dealing with construction permits is determined by sorting their distance to frontier scores for dealing with construction permits. These scores are the simple average of the distance to frontier scores for each of the component indicators.

To make the data comparable across economies, *Doing Business* uses several assumptions about the business and the warehouse, including the utility connections.

#### The business:

- Is a limited liability company operating in the construction business and located in the largest business city. For the 11 economies with a population of more than 100 million, data for a second city have been added. Is domestically owned and operated.
- Has 60 builders and other employees.

#### The warehouse:

- Is valued at 50 times income per capita.
- Is a new construction (there was no previous construction on the land).

# WHAT THE DEALING WITH CONSTRUCTION PERMITS INDICATORS MEASURE

## Procedures to legally build a warehouse (number)

Submitting all relevant documents and obtaining all necessary clearances, licenses, permits and certificates

Submitting all required notifications and receiving all necessary inspections

Obtaining utility connections for water and sewerage

Registering the warehouse after its completion (if required for use as collateral or for transfer of the warehouse)

# Time required to complete each procedure (calendar days)

Does not include time spent gathering information

Each procedure starts on a separate day. Procedures that can be fully completed online are recorded as ½ day.

Procedure considered completed once final document is received

No prior contact with officials

# Cost required to complete each procedure (% of warehouse value)

Official costs only, no bribes

- Will have complete architectural and technical plans prepared by a licensed architect or engineer.
- Will be connected to water and sewerage (sewage system, septic tank or their equivalent). The connection to each utility network will be 150 meters (492 feet) long.
- Will be used for general storage, such as of books or stationery (not for goods requiring special conditions).
- Will take 30 weeks to construct (excluding all delays due to administrative and regulatory requirements).

## Where does the economy stand today?

What does it take to comply with the formalities to build a warehouse in Bulgaria? According to data collected by *Doing Business*, dealing with construction permits there requires 16.0 procedures, takes 110.0 days and costs 4.5% of the warehouse value (figure 3.1). Most indicator sets refer to a case scenario in the largest business city of

an economy, except for 11 economies for which the data are a population-weighted average of the 2 largest business cities. See the chapter on distance to frontier and ease of doing business ranking at the end of this profile for more details.

*Note*: Time shown in the figure above may not reflect simultaneity of procedures. Online procedures account for 0.5 days in the total time calculation. For more information on the methodology of the dealing with construction permits indicators, see the *Doing Business* website (http://www.doingbusiness.org). For details on the procedures reflected here, see the summary at the end of this chapter.

Globally, Bulgaria stands at 101 in the ranking of 189 economies on the ease of dealing with construction permits (figure 3.2). The rankings for comparator

economies and the regional average ranking provide other useful information for assessing how easy it is for an entrepreneur in Bulgaria to legally build a warehouse.

Figure 3.2 How Bulgaria and comparator economies rank on the ease of dealing with construction permits

#### What are the details?

The indicators reported here for Bulgaria are based on a set of specific procedures—the steps that a company must complete to legally build a warehouse—identified by *Doing Business* through information collected from experts in construction licensing, including architects, civil engineers, construction lawyers, construction firms, utility service providers and public officials who deal with building regulations. These procedures are those that apply to a company and structure matching the standard assumptions used by *Doing Business* in collecting the data (see the section in this chapter on what the indicators cover).

# Estimated cost of construction : BGN 512,513 City: Sofia

The procedures, along with the associated time and cost, are summarized below.

Table 3.2 Summary of time, cost and procedures for dealing with construction permits in Bulgaria -

No.	Procedure	Time to complete	Cost to complete
1	Apply for VISA from the Chief Architect of the Municipality  To obtain the design permit, BuildCo must submit an application form, a title of property or proof of ownership, a sketch of the acting regulation plan, and a change proposal with tax receipts. The time limit for obtaining the design permit is 14 days, according to the Law of the Spatial Planning (Article 140). The design permit fees are set according to Decision No 894, Protocol No 93 (dated November 23, 2006) of the Sofia Municipal Council, Addendum 4, Article 2, as shown below. Fee schedule for design permit request:  Residential buildings: BGN 40.00  Nonresidential buildings: BGN 150.00  As of January 2009, the design visa can be obtained through a fast track option. For nonresidential buildings it will cost BGN 300.00.	14 days	BGN 150
2	Sign preliminary contract with the electricity provider  BuildCo must obtain approval from the electricity provider and sign a preliminary contract for connection to the public network. BuildCo must submit a request for examining the conditions for connection to the network. According to the rate of services published by CEZ Bulgaria, the price for clients with capacity of up to 500 kW is 211,92 BGN without VAT.  Agency: CEZ Bulgaria	30 days	BGN 212

## Bulgaria

No.	Procedure	Time to complete	Cost to complete
3	* Sign preliminary contracts with the water authorities  In principle, BuildCo must obtain approval from the water authorities. The approval is valid for a year. Several documents are necessary to obtain this approval, including proof of ownership, the plan, the application form, the design permit, and the investment design by the Municipality's Chief Architect. Because this procedure is carried out simultaneously with Procedure 2, the filing is submitted at the same time. On these grounds, the water company undertakes a preliminary survey and subsequently issues a report that contains the necessary technical data and the specifications for the network connection.  Agency: Water Authorities	5 days	BGN 720
4	* Request and obtain preliminary assessment of the building for its compliance with energy efficiency requirements from licensed company  Every investment project for construction, reconstruction and modernization, on the basis of which permission for construction is granted, has to be assessed for its compliance with the energy efficiency requirements. There is no fixed price for the issuance of a certificate for energy effectiveness. The rates are subject to negotiation and vary between BGN 1.00 BGN 1.50 per sq. m. The assessment is done by a privately licensed company.  Agency: Licensed Company	5 days	BGN 2,601
5	* Obtain decision from the Director of the Regional Inspectorate of Environment and Water  The Law on Environment Protection (Appendix 1 and Appendix 2) defines the investment projects that are subject to an environmental impact assessment (EIA). The warehouse building for storing books and stationary does not fall among the investment projects listed in both appendices. Thus, the EIA is not obligatory. However, a decision issued by the Director of the Regional Inspectorate of Protection of Environment is required to confirm that EIA is not necessary. The decision is issued within 30 days of submitting the request. The decision is valid for 5 years.  Agency: Regional Inspectorate of Environment and Water	14 days	no charge
6	* Obtain approval of the investment project design from a hygiene epidemiological expert  Required documents for the issuance of a hygiene certificate are a request form, a permit for designing, approval letters from water and electricity authority, expert opinion from the regional sanitary inspector, and other project documents. The hygiene epidemiological expert's fees for consulting services are BGN 4.50 per hour. The overall cost of the approval is based on two criteria: the number of experts involved in the inspection and billable hours.	7 days	BGN 70

No.	Procedure	Time to complete	Cost to complete
	Agency: Hygiene Epidemiological Expert		
7	Obtain final construction approval from the Chief Architect of the Municipality  The fees are BGN 8.00 per sq. m., according to Decision No. 894, Protocol No. 93 (dated November 23, 2006, and amended in February 5, 2008) of the Sofia Municipal Council, Addendum 4, Table 1, assuming suburban Zone V.  Once the Chief of Architect of the Municipality has issued the permission (or VISA) BuildCo must submit a folder with 12-13 files, including all the approvals from different departments (water, electricity, environment, etc.). A "project number" or tracking number is issued to BuildCo by the Municipality confirming that the complete file has been received. It takes about one month (sometimes more depending on the Municipality) to receive the final construction approval. However, even though the construction approval has been issued, construction is not allowed to commence yet, as there is a 14-day period which allows for an appeal on behalf of the residents in the area where the construction will take place (Article 149 (4) of Bulgarian Law of Spatial Planning from 2003). Construction work can only start on the 15th day.  Agency: Municipality	35 days	BGN 10,405
8	BuildCo must sign a contract with an independent construction supervision firm. This supervisor must be licensed by the Ministry of Regional Development and Public Works. The supervisor will sign all acts and records during construction. The firm's instructions and orders are binding for BuildCo and the technical manager. Within 3 days of being issued, objections against the supervisory firm's instructions can be made before the Directorate for National Construction Control. Construction will be stopped until a decision is reached, and the decision is considered to be a new set of binding rules.  The supervisor must notify the Regional Directorate for National Construction control of any irregularities within 3 days of detection. The supervisor will be responsible for damages caused to the assignor and to the other participants in the construction, and jointly responsible with BuildCo for damages caused by not complying with the technical rules and the approved designs. The supervision contract must be valid for the entire construction process.  The rates for a contract are between BGN 6.00 and BGN 10.00 per sq. m. of built area. However, the cost for this procedure is subject to negotiation between the investor and the surveillance company. There is no legally regulated minimum cost, but the Bulgarian Association of	5 days	BGN 7,150

## Bulgaria

No.	Procedure	Time to complete	Cost to complete
	Architects and Engineers has issued an act containing recommended fees. The fees depend on the value of the construction work but may not be less than BGN 800.00. After the end of the construction, the person exercising construction supervision will prepare a final report to the assignor.  Agency: Surveillance Company		
	Sign contract with water provider and receive connection		
9	The decision is valid for 3 years, according to the Order of the Environmental Protection Law.  Agency: Water Authorities	5 days	BGN 720
10	Map the building on the cadastre  The Agency for Geodesy, Cartography and Cadastre issues a document after the building has been mapped. As of June 2007 the procedure can be done in fast track option in 4 hours for BGN 30.00. The fee is collected in the system of the Ministry of Regional Development and Public Works, according to Article 42, Paragraph 1, of the Tariff 14 promulgated SG No. 94/1998.  Agency: Agency for Geodesy, Cartography and Cadastre	1 day	BGN 30
11	Have the Construction Surveillance file a report on the completed construction  After the construction is finished, the assignor, the designer, the constructor, and the supervisor must issue a document confirming that the construction has been carried out in accordance with the approved designs, the certified executive documentation, the requirements of the construction and the conditions of the contract. The records for conducted trials on the machines and on the facilities should also be attached. The transfer of the construction by the constructor to the assignor is also implemented.  Agency: Construction Surveillance	1 day	no charge
12	A technical passport is registered with the Chief Architect of the Municipality  The Law on Spatial Development was supplemented on September 15, 2006, State Gazette, Issue No. 76. The law contains a new requirement for licensed experts performing surveillance control. A technical passport for the construction should be prepared after the completion of construction. This document defines all terms for the performance of any major or current repairs and contains data on all certificates issued (those required by the construction legislation).	3 days	no charge

No.	Procedure	Time to complete	Cost to complete
	Inspections should also be recorded in the passport. The technical passport must be prepared by the surveillance company. Either the surveillance company or the investor files two copies of the technical passport (one for the investor and one for the Chief Architect of the Municipality) and an electronic copy with the Chief Architect of the Municipality Office for Registration. The registration of the technical passport may take 2 or 3 days (no charge) after which the investor or the surveillance company may take back their original (it should bear a stamp with the date and the registration number).  **Agency: Municipality**		
	File a copy of the registered technical passport with the Cadastre		
13	A copy of the registered original technical passport (notarization not required), along with the original technical passport, should be filed with the Cadastre Agency (this second procedure costs BGN 2.00 and is completed in one day). The copy is to be kept by the Cadastre Agency, while the original (with a stamped registration number) is returned to the investor.  **Agency: Cadastre**	1 day	BGN 2
	Request and obtain certificate for energy efficiency		
14	After completing a new construction, a certificate for energy efficiency (energy passport) must be issued as part of the technical passport of the construction. The issuance of the certificate is performed under a contract signed by the assignor and natural person/entity and is entered in the register for the persons authorized to perform certification for energy efficiency.  Agency: Licensed Company	7 days	no charge
	, gener, account company		
15	Receive inspection by the Municipality  A State Commission coordinated by National Construction Control Department grants final approval of the building construction. The commission is comprised of members from different authorities, including the Hygienic Epidemiological Institute and the Fire Alarm Security Service.  Agency: Municipality - National Construction Control Department	1 day	no charge
	Obtain approval of the building and occupancy permit from the Municipality		
16	After completing the construction and tests of facilities, the assignor must register before the Chief Architect of the Municipality, present the ultimate report, the utility provider contracts, and document from the cadastral agency that its requirements have been fulfilled in order to	7 days	BGN 750

## Doing Business 2015

No.	Procedure	Time to complete	Cost to complete
	obtain an occupancy permit. The Municipality issues the occupancy permit within 7 days.  Agency: Municipality		

<sup>\*</sup> Takes place simultaneously with another procedure.

*Note*: Online procedures account for 0.5 days in the total time calculation.

Access to reliable and affordable electricity is vital for businesses. To counter weak electricity supply, many firms in developing economies have to rely on self-supply, often at a prohibitively high cost. Whether electricity is reliably available or not, the first step for a customer is always to gain access by obtaining a connection.

#### What do the indicators cover?

Doing Business records all procedures required for a local business to obtain a permanent electricity connection and supply for a standardized warehouse, as well as the time and cost to complete them. These procedures include applications and contracts with electricity utilities, clearances from other agencies and the external and final connection works. The ranking of economies on the ease of getting electricity is determined by sorting their distance to frontier scores for getting electricity. These scores are the simple average of the distance to frontier scores for each of the component indicators. To make the data comparable across economies, several assumptions are used.

#### The warehouse:

- Is owned by a local entrepreneur, located in the economy's largest business city, in an area where other warehouses are located. For the 11 economies with a population of more than 100 million, data for a second city have been added.
- Is not in a special economic zone where the connection would be eligible for subsidization or faster service.
- Is located in an area with no physical constraints (ie. property not near a railway).
- Is a new construction being connected to electricity for the first time.
- Is 2 stories, both above ground, with a total surface of about 1,300.6 square meters (14,000 square feet), is built on a plot of 929 square meters (10,000 square feet), is used for storage of refrigerated goods

#### The electricity connection:

 Is 150 meters long and is a 3-phase, 4-wire Y, 140-kilovolt-ampere (kVA) (subscribed capacity) connection.

# WHAT THE GETTING ELECTRICITY INDICATORS MEASURE

## Procedures to obtain an electricity connection (number)

Submitting all relevant documents and obtaining all necessary clearances and permits

Completing all required notifications and receiving all necessary inspections

Obtaining external installation works and possibly purchasing material for these works

Concluding any necessary supply contract and obtaining final supply

# Time required to complete each procedure (calendar days)

Is at least 1 calendar day

Each procedure starts on a separate day

Does not include time spent gathering information

Reflects the time spent in practice, with little follow-up and no prior contact with officials

# Cost required to complete each procedure (% of income per capita)

Official costs only, no bribes

Excludes value added tax

- Is to either the low-voltage or the mediumvoltage distribution network and either overhead or underground, whichever is more common in the area where the warehouse is located. Included only negligible length in the customer's private domain.
- Requires crossing of a 10-meter road but all the works are carried out in a public land, so there is no crossing into other people's private property.
- Involves installing one electricity meter. The monthly electricity consumption will be 26880 kilowatt hour (kWh). The internal electrical wiring has been completed.

## Where does the economy stand today?

What does it take to obtain a new electricity connection in Bulgaria? According to data collected by *Doing Business*, getting electricity there requires 6.0 procedures, takes 130.0 days and costs 320.4% of income per capita (figure 4.1).

Most indicator sets refer to a case scenario in the largest business city of an economy, except for 11 economies for which the data are a population-weighted average of the 2 largest business cities. See the chapter on distance to frontier and ease of doing business ranking at the end of this profile for more details.

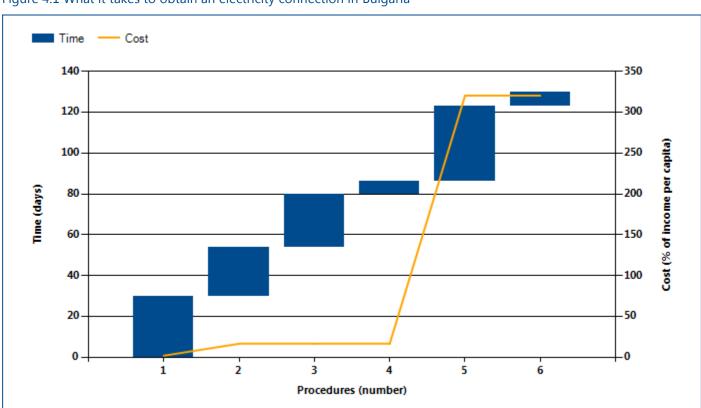

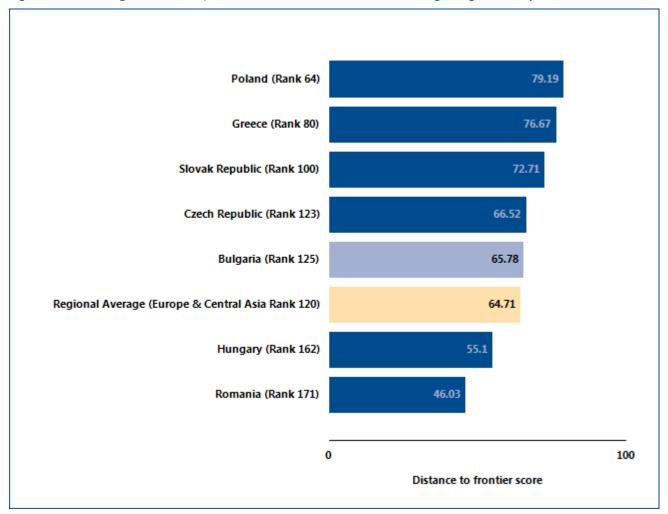

Figure 4.1 What it takes to obtain an electricity connection in Bulgaria -

*Note*: Time shown in the figure above may not reflect simultaneity of procedures. For more information on the methodology of the getting electricity indicators, see the *Doing Business* website (http://www.doingbusiness.org). For details on the procedures reflected here, see the summary at the end of this chapter.

Globally, Bulgaria stands at 125 in the ranking of 189 economies on the ease of getting electricity (figure 4.2). The rankings for comparator economies and the regional

average ranking provide another perspective in assessing how easy it is for an entrepreneur in Bulgaria to connect a warehouse to electricity.

Figure 4.2 How Bulgaria and comparator economies rank on the ease of getting electricity

#### What are the details?

The indicators reported here for Bulgaria are based on a set of specific procedures—the steps that an entrepreneur must complete to get a warehouse connected to electricity by the local distribution utility—identified by *Doing Business*. Data are collected from the distribution utility, then completed and verified by electricity regulatory agencies and independent professionals such as electrical engineers, electrical contractors and construction companies. The electricity distribution utility surveyed is the one serving the area (or areas) in which warehouses are located. If there is a choice of distribution utilities, the one serving the largest number of customers is selected.

# OBTAINING AN ELECTRICITY CONNECTION Name of utility: CEZ Distribution Bulgaria AD City: Sofia

The procedures are those that apply to a warehouse and electricity connection matching the standard assumptions used by *Doing Business* in collecting the data (see the section in this chapter on what the indicators cover). The procedures, along with the associated time and cost, are summarized below.

Table 4.2 Summary of time, cost and procedures for getting electricity in Bulgaria -

No.	Procedure	Time to complete	Cost to complete
1	Submit application for preliminary contract with CEZ Distribution Bulgaria and await estimate  An application cannot be submitted online because it needs to be signed. The application is submitted in one of the client centers of CEZ Distribution Bulgaria JSC. The following documents should be submitted with the application:  • Visa for exploration (this is an excerpt from the acting detailed development plan)  • Documents proving rights of ownership  • (if needed) Power of Attorney of the person submitting the application on behalf of the company  • Company documents - Court decision for registration  • BULSTAT and other documents  All documents except the visa for exploration need notarization. After depositing the application the customer has to wait for the estimate. The estimate is a preliminary contract that states the conditions for connection and how the site will be connected.  **Agency: CEZ Distribution Bulgaria*	30 calendar days	BGN 211.92
2	Receive preliminary contract and prepare design of connection works  After receiving the estimate (utility checks and prescribes the technical way/possibility for connection) and based on that estimate, the customer has to design the external connections. The customer would usually hire	24 calendar days	BGN 1,500

No.	Procedure	Time to complete	Cost to complete
	an electrical design firm for this. The design has to be coordinated with other agencies.  Agency: Electrical design firm		
3	Submit application for conclusion of contract with CEZ Distribution Bulgaria and await final contract and approval of design  Once the estimate is received, the customer should submit an application for the conclusion of the contract, accompanied with all documents in accordance with the Ordinance 6 for connection of producers and customers of electricity to the distribution network. The design for the external connection has to be included in this application because the utility has to approve it. The internal wiring of the warehouse is assessed by the contractor who is managing the overall warehouse project. The assessment of the internal wiring has to be submitted with this application.  Agency: CEZ Distribution Bulgaria	26 calendar days	BGN 0
4	Purchase material  The utility can buy and provide the material, however most of the customers choose to buy the material on the market themselves. The difference between the material cost and the connection fee paid by the customer will be reimbursed to the customer after the connection has been finalized.  Agency: Customer	6 calendar days	BGN 0
5	External connection works are carried out by the utility  External connection works involve digging, laying down the cables, installation of equipment and the connection. The physical works are done by the utility. The connection fee is also called fee for exploitation; it is a function of the power provided (140 kVA) and the distance from the point of connection.  Agency: CEZ Distribution Bulgaria	37 calendar days	BGN 31,135
6	Receive note from utility and conclude contract with electricity supplier, obtain meter installation and flow of electricity  After the external wiring is finished, CEZ Distribution will issue an official note to the customer. Along with the note, the customer can conclude a contract with the provider of electricity (CEZ Electro Bulgaria AD). The	7 calendar days	BGN 0

	utility needs a copy of the contract for supply of electricity in order to install the meter. The contract is sent automatically to CEZ Distribution by CEZ Electro, the customer does not have to send it him/herself. When concluding the supply contract with CEZ Electro the client is informed when the meter will be installed.  Agency: CEZ Electro Bulgaria/CEZ Distribution Bulgaria AD		

<sup>\*</sup> Takes place simultaneously with another procedure.

Ensuring formal property rights is fundamental. Effective administration of land is part of that. If formal property transfer is too costly or complicated, formal titles might go informal again. And where property is informal or poorly administered, it has little chance of being accepted as collateral for loans—limiting access to finance.

#### What do the indicators cover?

Doing Business records the full sequence of procedures necessary for a business to purchase property from another business and transfer the property title to the buyer's name. The transaction is considered complete when it is opposable to third parties and when the buyer can use the property, use it as collateral for a bank loan or resell it. The ranking of economies on the ease of registering property is determined by sorting their distance to frontier scores for registering property. These scores are the simple average of the distance to frontier scores for each of the component indicators. To make the data comparable across economies, several assumptions about the parties to the transaction, the property and the procedures are used.

The parties (buyer and seller):

- Are limited liability companies, 100% domestically and privately owned and perform general commercial activities.
- Are located in the economy's largest business city<sup>2</sup>.
- Have 50 employees each, all of whom are nationals.

The property (fully owned by the seller):

- Has a value of 50 times income per capita.
   The sale price equals the value.
- Is registered in the land registry or cadastre, or both, and is free of title disputes.
- Property will be transferred in its entirety.

#### WHAT THE REGISTERING PROPERTY

#### **INDICATORS MEASURE**

# Procedures to legally transfer title on immovable property (number)

Preregistration (for example, checking for liens, notarizing sales agreement, paying property transfer taxes)

Registration in the economy's largest business city<sup>2</sup>

Postregistration (for example, filing title with the municipality)

# Time required to complete each procedure (calendar days)

Does not include time spent gathering information

Each procedure starts on a separate day. Procedures that can be fully completed online are recorded as ½ day.

Procedure considered completed once final document is received

No prior contact with officials

# Cost required to complete each procedure (% of property value)

Official costs only, no bribes

No value added or capital gains taxes included

- Is located in a periurban commercial zone, and no rezoning is required.
- Has no mortgages attached, has been under the same ownership for the past 10 years.
- Consists of 557.4 square meters (6,000 square feet) of land and a 10-year-old, 2-story warehouse of 929 square meters (10,000 square feet). The warehouse is in good condition and complies with all safety standards, building codes and legal requirements. There is no heating system.

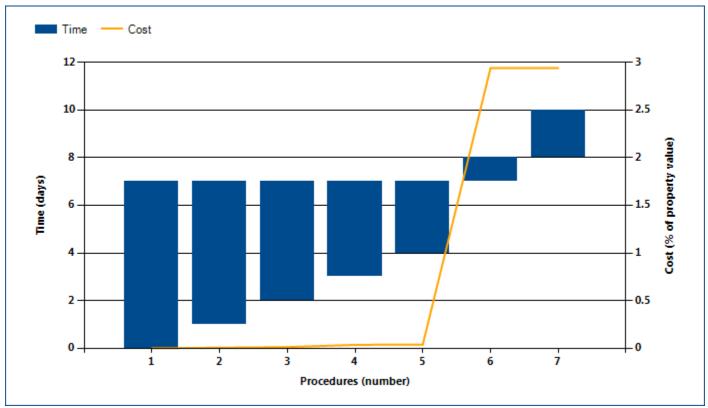

<sup>&</sup>lt;sup>2</sup> For the 11 economies with a population of more than 100 million, data for a second city have been added.

# Where does the economy stand today?

What does it take to complete a property transfer in Bulgaria? According to data collected by *Doing Business*, registering property there requires 7.0 procedures, takes 10.0 days and costs 2.9% of the property value (figure 5.1).

Most indicator sets refer to a case scenario in the largest business city of an economy, except for 11 economies for which the data are a population-weighted average of the 2 largest business cities. See the chapter on distance to frontier and ease of doing business ranking at the end of this profile for more details.

Figure 5.1 What it takes to register property in Bulgaria -

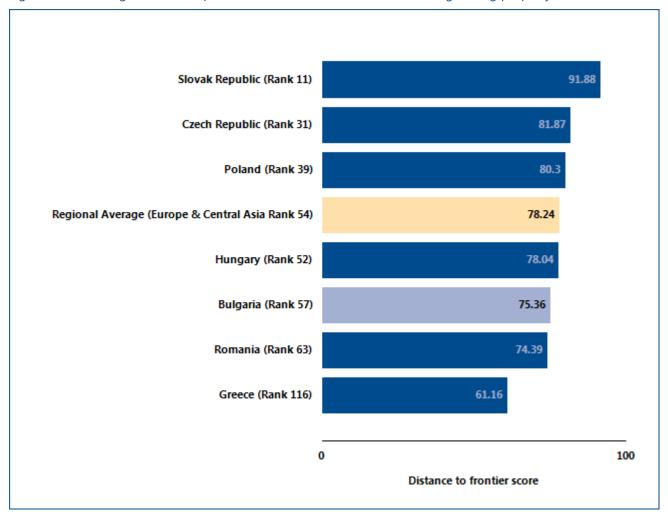

Note: Time shown in the figure above may not reflect simultaneity of procedures. Online procedures account for 0.5 days in the total time calculation. For more information on the methodology of the registering property indicators, see the *Doing Business* website (http://www.doingbusiness.org). For details on the procedures reflected here, see the summary at the end of this chapter. *Source: Doing Business* database.

Globally, Bulgaria stands at 57 in the ranking of 189 economies on the ease of registering property (figure 5.2). The rankings for comparator economies and the

regional average ranking provide other useful information for assessing how easy it is for an entrepreneur in Bulgaria to transfer property.

Figure 5.2 How Bulgaria and comparator economies rank on the ease of registering property

Economies worldwide have been making it easier for entrepreneurs to register and transfer property—such as by computerizing land registries, introducing time limits for procedures and setting low fixed fees. Many have cut

the time required substantially—enabling buyers to use or mortgage their property earlier. What property registration reforms has *Doing Business* recorded in Bulgaria (table 5.1)?

Table 5.1 How has Bulgaria made registering property easier—or not? By *Doing Business* report year from DB2010 to DB2015

DB year	Reform
DB2010	Bulgaria reduced the time required to register property by launching an integrated web-based property register making it possible to check the ownership and cadastre status of properties online.

*Note*: For information on reforms in earlier years (back to DB2005), see the *Doing Business* reports for these years, available at http://www.doingbusiness.org. *Source: Doing Business* database.

### What are the details?

The indicators reported here are based on a set of specific procedures—the steps that a buyer and seller must complete to transfer the property to the buyer's name—identified by *Doing Business* through information collected from local property lawyers, notaries and property registries. These procedures are those that apply to a transaction matching the standard assumptions used by *Doing Business* in collecting the data (see the section in this chapter on what the indicators cover).

# STANDARD PROPERTY TRANSFER

Property value: BGN 512,513

City: Sofia

The procedures, along with the associated time and cost, are summarized below.

Table 5.2 Summary of time, cost and procedures for registering property in Bulgaria

No.	Procedure	Time to complete	Cost to complete
1	Obtain the tax clearance certificate  The tax clearance certificate, showing that no taxes are owed, is obtained from the local tax department for the seller, according to Taxation and Insurance Procedure Code in effect as of 1 January 2006, namely Art. 87, paragraph 6.  Agency: Local Tax Department	7 days (simultaneous with Procedures 2, 3, 4 and 5)	BGN 6
2	* Obtain the tax valuation of a property  A tax valuation is a basis for calculating the fees for notary deeds only in case when the Purchase (sale) price is equal to the Tax Valluation price, in case if the Sale price is higher than the basis is Sale Price - or the higher Price is always a Basis but not less that the Tax Valuation Price  Agency: Sofia Municipality - Tax department	14 days (regular), 7 days (quick) and 3 day (express) (simultaneous with procedures 1, 3, 4, and 5)	BGN 17 for 14-day procedure, BGN 25.50 for 7-day procedure and BGN 34 for 3-day procedure
3	* Obtain the non-encumbrance certificate from the Real Estate Register  The express Procedures are implemented in the Tariff for the taxes collected by the Registry Agency, published in State Gazette, issue 94 of 25 November 2005, last amended by State Gazette issue 104 of 27 December 2011.  Agency: Real Estate Registry	Regular service (7 working days); Fast service (3 working days); (simultaneous with procedures 1, 2, 4, and 5)	BGN 10 for regular service (7 working days), BGN 30 for Fast service (3 working days)

No.	Procedure	Time to complete	Cost to complete
4	* The sketch of the estate is drafted by the respective Municipality  The draft of the estate is a graphic sketch of the estate with its borders, square meters, and number of the area where the estate is situated. This draft is issued at the Cadastre of Real Estate. If the sketch is for a real estate in the urban area, principally, the sketch is issued by the Local Geodesy, Cartography and Cadastre Service. In case the sketch is required for agricultural land, the sketch is issued by the respective municipal agricultural service. If for the respective territory there is no cadastre card adopted and approved, then the sketch is then issued by the Municipality.  Agency: Local Geodesy, Cartography and Cadastre Service	3 days (regular); 1 day Procedure or 4 hours express (simultaneous with Procedures 1, 2, 3 and 5)	"Obtaining sketch for land: BGN 30 for a 3-day procedure (regular), BGN 45 for a 1-day procedure and BGN 90 per 4 hoursObtaining sketch for building: BGN 10 for a 3-day procedure (regular), BGN 15 for a 1-day procedure and BGN 30 per 4 hours"
5	* Issuance of certificates of good standing for seller and buyer  Certificate will be obtained at the Registration Agency. As of January 1, 2008 all companies in Bulgaria are registered by the new centralized Commercial Register. The companies are to be re-registered until 31 December 2011 with the Commercial Register. Starting January 1, 2012 companies, which have not been re-registered with the Register are to be liquidated. The certificate is needed to show that the company is registered and existing, and that the person who signs on behalf of the company is actually the authorized person to sign. The certificate can be obtained online since 2009.  Agency: Registration Agency	1 day (simultaneous with Procedures 1, 2, 3, and 4)	BGN 7 each certificate
6	The notary executes the transfer deed and collects the money for payment of the state fee (transfer tax) and the registration fee. Usually the notary pays the state and registration fees. This is done for the clients' convenience. The parties can pay the fees at the account of the tax authority where the estate is situated and bring the receipts to the notary. Local tax for acquisition of real estate varies between 0.1% to 3% of either the (i) the purchase price or (ii) the tax evaluation of the real estate (whichever one is higher). The local tax is subject to determination by each municipality on yearly basis. The local tax in Sophia increased from 2% to 2.5% in 07.03.2008 according to the Local Taxes and Fees Act.  Agency: Notary Public operating within the Sofia Regional Court	1 day	2.5% of property price (local tax) + 0.1% of property price (Registration fee) + notary's fees according to the following scale and with a maximum of BGN 6,000:An amendment in Local Taxes and Fees Act promulgated in

No.	Procedure	Time to complete	Cost to complete
	Registration of notarized deed at the Registry	complete	
	The notary will register the notarized deed at the registration office with the respective district court. This can be done by the parties too, but it is most common that the notary will do it (and it is included in the above fees). The notary will pay registration and state fees collected previously. Registration should take 1 day, but it can take up to 3 days during busy periods.		
	According to Art.25, para 5 of the Notary Public and Notarial Activity Law of 2009 (last amendment of the Notary Public and Notarial Activity Act was promulgated in State Gazette, issue 82 of 16 October 2009, http://dv.parliament.bg/DVWeb/broeveList.faces), the notary now has to submit the notarized deed in the same day it is signed. In practice, this generally happens in Sophia.		
7	The notarized deed will be registered by the Notary Public with the respective office of the Registry Agency. The Notary Public and Notarial Activity Law last amended by State Gazette issue 82 of October 21, 2011.	2 days	Already paid in Procedure 6
	If a notary public does not perform their obligation for entry of a notary deed or other notary certified act with the real estate register, the interested persons are entitled to claim the suffered damages. Furthermore, the interested persons may address the Notary Chamber regarding the violations of the notary's obligations. This may entail disciplinary proceedings against the respective notary public.		
	This amendment also ensures that the notaries public have access to the National Database "Population" and to the National Automatic Information Fund for personal identity documents. It also introduced an obligation for the notaries public to make special checks in the database and the fund when performing notary certifications connected to rights over real estates.		
	Agency: Registration Agency		

<sup>\*</sup> Takes place simultaneously with another procedure.

 $\it Note$ : Online procedures account for 0.5 days in the total time calculation.

Two types of frameworks can facilitate access to credit and improve its allocation: credit information systems and borrowers and lenders in collateral and bankruptcy laws. Credit information systems enable lenders' rights to view a potential borrower's financial history (positive or negative)—valuable information to consider when assessing risk. And they permit borrowers to establish a good credit history that will allow easier access to credit. Sound collateral laws enable businesses to use their assets, especially movable property, as security to generate capital—while strong creditors' rights have been associated with higher ratios of private sector credit to GDP.

#### What do the indicators cover?

Doing Business assesses the sharing of credit information and the legal rights of borrowers and lenders with respect to secured transactions through 2 sets of indicators. The depth of credit information index measures rules and practices affecting the coverage, scope and accessibility of credit information available through a credit registry or a credit bureau. The strength of legal rights index measures whether certain features that facilitate lending exist within the applicable collateral and bankruptcy laws. Doing Business uses two case scenarios, Case A and Case B, to determine the scope of the secured transactions system, involving a secured borrower and a secured lender and examining legal restrictions on the use of movable collateral (for more details on each case, see the Data Notes section of the *Doing Business 2015* report). These scenarios assume that the borrower:

- Is a private limited liability company.
- Has its headquarters and only base of operations in the largest business city. For the 11 economies with a population of more than 100 million, data for a second city have been added.

# WHAT THE GETTING CREDIT INDICATORS MEASURE

# Strength of legal rights index (0-12)<sup>3</sup>

Rights of borrowers and lenders through collateral laws

Protection of secured creditors' rights through bankruptcy laws

### Depth of credit information index (0-8)<sup>4</sup>

Scope and accessibility of credit information distributed by credit bureaus and credit registries

#### **Credit bureau coverage (% of adults)**

Number of individuals and firms listed in largest credit bureau as percentage of adult population

#### **Credit registry coverage (% of adults)**

Number of individuals and firms listed in credit registry as percentage of adult population

- Has up to 50 employees.
- Is 100% domestically owned, as is the lender.

The ranking of economies on the ease of getting credit is determined by sorting their distance to frontier scores for getting credit. These scores are the distance to frontier score for the strength of legal rights index and the depth of credit information index.

<sup>&</sup>lt;sup>3</sup> For the legal rights index, 2 new points are added in *Doing Business 2015* for new data collected to assess the overall legal framework for secured transactions and the functioning of the collateral registry.

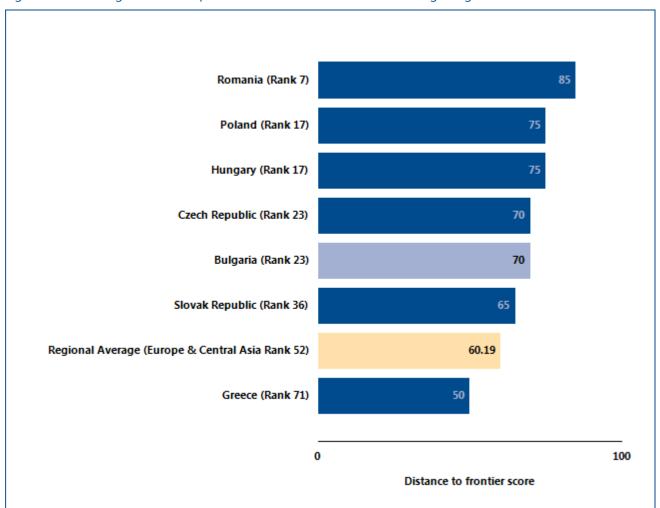

<sup>&</sup>lt;sup>4</sup> For the credit information index, 2 new points are added in *Doing Business 2015* for new data collected on accessing borrowers' credit information online and availability of credit scores.

# Where does the economy stand today?

How well do the credit information system and collateral and bankruptcy laws in Bulgaria facilitate access to credit? The economy has a score of 5 on the depth of credit information index and a score of 9 on the strength of legal rights index (see the summary of scoring at the end of this chapter for details). Higher scores indicate more credit information and stronger legal rights for borrowers and lenders.

Globally, Bulgaria stands at 23 in the ranking of 189 economies on the ease of getting credit (figure 6.1). The rankings for comparator economies and the regional average ranking provide other useful information for assessing how well regulations and institutions in Bulgaria support lending and borrowing.

Figure 6.1 How Bulgaria and comparator economies rank on the ease of getting credit

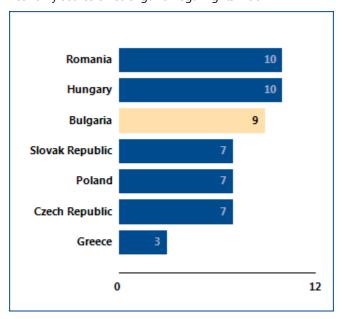

One way to put an economy's score on the getting credit indicators into context is to see where the economy stands in the distribution of scores across economies. Figure 6.2 highlights the score on the strength of legal

rights index for Bulgaria and shows the scores for comparator economies as well as the regional average score. Figure 6.3 shows the same for the depth of credit information index.

Figure 6.2 How strong are legal rights for borrowers and lenders?

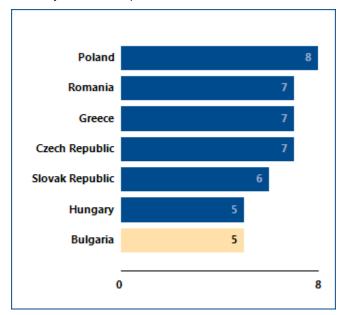

Economy scores on strength of legal rights index

Note: Higher scores indicate that collateral and bankruptcy laws are better designed to facilitate access to credit. Source: Doing Business database.

Figure 6.3 How much credit information is shared—and how widely?

Economy scores on depth of credit information index

Note: Higher scores indicate the availability of more credit information, from either a credit registry or a credit bureau, to facilitate lending decisions. If the credit bureau or registry is not operational or covers less than 5% of the adult population, the total score on the depth of credit information index is 0.

When economies strengthen the legal rights of lenders and borrowers under collateral and bankruptcy laws, and increase the scope, coverage and accessibility of credit information, they can increase entrepreneurs' access to credit. What credit reforms has *Doing Business* recorded in Bulgaria (table 6.1)?

Table 6.1 How has Bulgaria made getting credit easier—or not? By *Doing Business* report year from DB2010 to DB2015

DB year	Reform
DB2012	Bulgaria made access to credit information more difficult by stopping the distribution of credit reports to financial institutions by the private credit bureau (Experian).

Note: For information on reforms in earlier years (back to DB2005), see the *Doing Business* reports for these years, available at http://www.doingbusiness.org.

Source: Doing Business database.

#### What are the details?

The getting credit indicators reported here for Bulgaria are based on detailed information collected in that economy. The data on credit information sharing are collected through a survey of a credit registry and/or credit bureau (if one exists). To construct the depth of credit information index, a score of 1 is assigned for each of 8 features of the credit registry or credit bureau (see summary of scoring below).

The data on the legal rights of borrowers and lenders are gathered through a survey of financial lawyers and verified through analysis of laws and regulations as well as public sources of information on collateral and bankruptcy laws. For the strength of legal rights index, a score of 1 is assigned for each of 10 aspects related to legal rights in collateral law and 2 aspects in bankruptcy law.

Strength of legal rights index (0–12)	Index score: 9
Does an integrated or unified legal framework for secured transactions that extends to the creation, publicity and enforcement of functional equivalents to security interests in movable assets exist in the economy?	No
Does the law allow businesses to grant a non possessory security right in a single category of movable assets, without requiring a specific description of collateral?	Yes
Does the law allow businesses to grant a non possessory security right in substantially all of its assets, without requiring a specific description of collateral?	Yes
May a security right extend to future or after-acquired assets, and may it extend automatically to the products, proceeds or replacements of the original assets?	Yes
Is a general description of debts and obligations permitted in collateral agreements; can all types of debts and obligations be secured between parties; and can the collateral agreement include a maximum amount for which the assets are encumbered?	Yes
Is a collateral registry in operation for both incorporated and non-incorporated entities, that is unified geographically and by asset type, with an electronic database indexed by debtor's name?	Yes
Does a notice-based collateral registry exist in which all functional equivalents can be registered?	No
Does a modern collateral registry exist in which registrations, amendments, cancellations and searches can be performed online by any interested third party?	No
Are secured creditors paid first (i.e. before tax claims and employee claims) when a debtor defaults outside an insolvency procedure?	Yes
Are secured creditors paid first (i.e. before tax claims and employee claims) when a business is liquidated?	Yes
Are secured creditors subject to an automatic stay on enforcement when a debtor enters a court-supervised reorganization procedure? Does the law protect secured creditors' rights by providing clear grounds for relief from the stay and/or sets a time limit for it?	Yes

Strength of legal rights index (0–12)	Index score: 9
Does the law allow parties to agree on out of court enforcement at the time a security interest is created? Does the law allow the secured creditor to sell the collateral through public auction and private tender, as well as, for the secured creditor to keep the asset in satisfaction of the debt?	Yes

Depth of credit information index (0–8)	Credit bureau	Credit registry	Index score: 5
By law, do borrowers have the right to access their data in the credit bureau or credit registry?	No	Yes	1
Can banks and financial institutions access borrowers' credit information online (for example, through an online platform, a system-to-system connection or both)?	No	Yes	1
Are bureau or registry credit scores offered as a value- added service to help banks and financial institutions assess the creditworthiness of borrowers?	No	No	0
Are data on both firms and individuals distributed?	No	Yes	1
Are both positive and negative credit data distributed?	No	Yes	1
Are data from retailers or utility companies - in addition to data from banks and financial institutions - distributed?	No	No	0
Are at least 2 years of historical data distributed? (Credit bureaus and registries that distribute more than 10 years of negative data or erase data on defaults as soon as they are repaid obtain a score of 0 for this component.)	No	No	0
Are data on loan amounts below 1% of income per capita distributed?	No	Yes	1

*Note*: Prior to *Doing Business 2015*, the depth of credit information index covered only the first 6 features listed above. An economy receives a score of 1 if there is a "yes" to either bureau or registry. If the credit bureau or registry is not operational or covers less than 5% of the adult population, the total score on the depth of credit information index is 0.

Coverage	Credit bureau (% of adults)	Credit registry (% of adults)
Number of firms	0	154,000
Number of individuals	0	2,909,000
Percent of total	0.0	62.9

Protecting minority investors matters for the ability of companies to raise the capital they need to grow, innovate, diversify and compete. Effective regulations define related-party transactions precisely, promote clear and efficient disclosure requirements, require shareholder participation in major decisions of the company and set detailed standards of accountability for company insiders.

#### What do the indicators cover?

Doing Business measures the protection of minority investors from conflicts of interest through one set of indicators and shareholders' rights in corporate governance through another. The ranking of economies on the strength of minority investor protections is determined by sorting their distance to frontier scores for protecting minority investors. These scores are the simple average of the distance to frontier scores for the extent of conflict of interest regulation index and the extent of shareholder governance index. To make the data comparable across economies, a case study uses several assumptions about the business and the transaction.

#### The business (Buyer):

- Is a publicly traded corporation listed on the economy's most important stock exchange (or at least a large private company with multiple shareholders).
- Has a board of directors and a chief executive officer (CEO) who may legally act on behalf of Buyer where permitted, even if this is not specifically required by law.

#### The transaction involves the following details:

- Mr. James, a director and the majority shareholder of the company, proposes that the company purchase used trucks from another company he owns.
- The price is higher than the going price for used trucks, but the transaction goes forward.
- All required approvals are obtained, and all required disclosures made, though the transaction is prejudicial to Buyer.
- Shareholders sue the interested parties and the members of the board of directors.

# WHAT THE PROTECTING MINORITY INVESTORS INDICATORS MEASURE

#### Extent of disclosure index (0-10)

Review and approval requirements for related-party transactions; Disclosure requirements for related-party transactions

#### Extent of director liability index (0-10)

Ability of minority shareholders to sue and hold interested directors liable for prejudicial related-party transactions; Available legal remedies (damages, disgorgement of profits, fines, imprisonment, rescission of the transaction)

#### Ease of shareholder suits index (0-10)

Access to internal corporate documents; Evidence obtainable during trial and allocation of legal expenses

# Extent of conflict of interest regulation index (0–10)

Sum of the extent of disclosure, extent of director liability and ease of shareholder indices, divided by 3

#### Extent of shareholder rights index (0-10.5)

Shareholders' rights and role in major corporate decisions

# Strength of governance structure index (0-10.5)

Governance safeguards protecting shareholders from undue board control and entrenchment

#### **Extent of corporate transparency index (0-9)**

Corporate transparency on ownership stakes, compensation, audits and financial prospects

# Extent of shareholder governance index (0–10)

Sum of the extent of shareholders rights, strength of governance structure and extent of corporate transparency indices, divided by 3

#### Strength of investor protection index (0-10)

Simple average of the extent of conflict of interest regulation and extent of shareholder governance indices

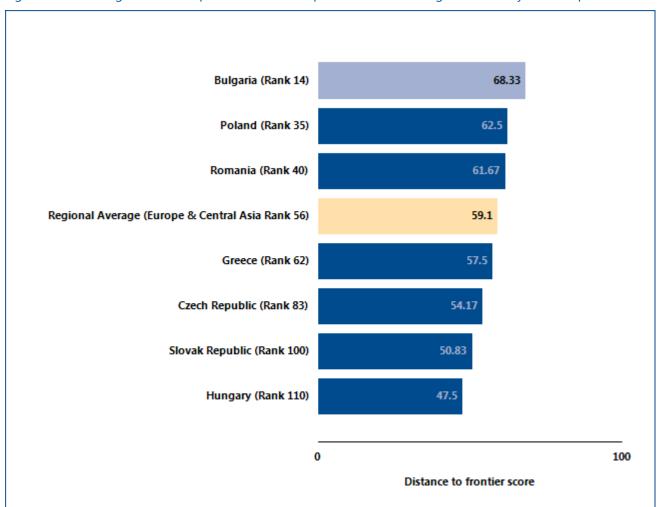

# Where does the economy stand today?

How strong are minority investor protections against self-dealing in Bulgaria? The economy has a score of 6.8 on the strength of minority investor protection index, with a higher score indicating stronger protections.

Globally, Bulgaria stands at 14 in the ranking of 189 economies on the strength of minority investor

protection index (figure 7.1). While the indicator does not measure all aspects related to the protection of minority investors, a higher ranking does indicate that an economy's regulations offer stronger minority investor protections against self-dealing in the areas measured.

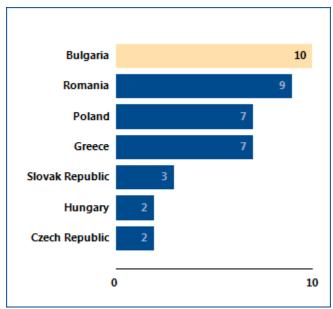

Figure 7.1 How Bulgaria and comparator economies perform on the strength of minority investor protection index

One way to put an economy's scores on the protecting minority investors indicators into context is to see where the economy stands in the distribution of scores across comparator economies. Figures 7.2 through 7.7 highlight the scores on the various minority investor protection

Figure 7.2 How extensive are disclosure requirements?

#### Extent of disclosure index (0-10)

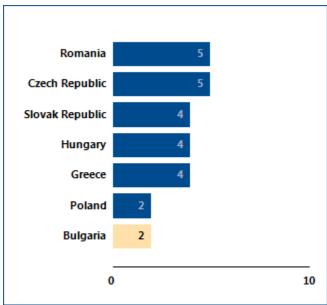

Note: Higher scores indicate greater disclosure.

Source: Doing Business database.

indices for Bulgaria in 2014. A summary of scoring for the protecting minority investors indicators at the end of this chapter provides details on how the indices were calculated.

Figure 7.3 How extensive is the liability regime for directors?

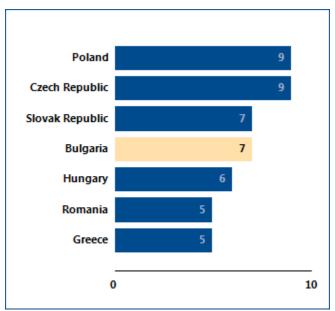

#### Extent of director liability index (0-10)

Note: Higher scores indicate greater liability of directors.

Figure 7.4 How easy is accessing internal corporate documents?

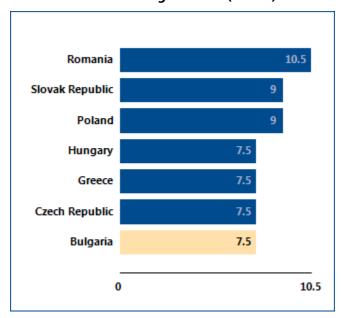

# Ease of shareholder suits index (0-10)

*Note*: Higher scores indicate greater minority shareholder access to evidence before and during trial.

Figure 7.5 How extensive are shareholder rights?

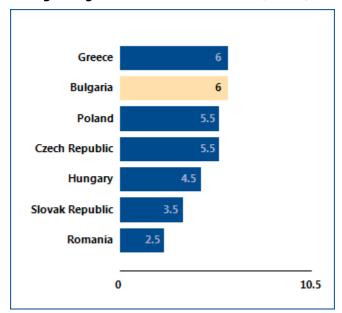

### Extent of shareholder rights index (0-10.5)

*Note:* The higher the score, the stronger the protections. *Source: Doing Business* database.

Figure 7.6 How strong is the governance structure?

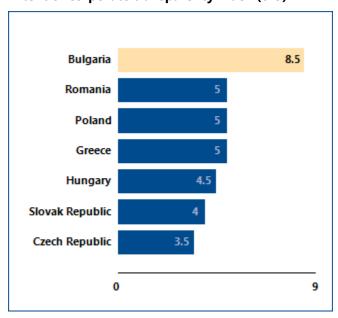

#### Strength of governance structure index (0-10.5)

*Note:* Higher scores indicate more stringent governance structure requirements.

Figure 7.7 How extensive is corporate transparency?

### Extent of corporate transparency index (0-9)

*Note*: Higher scores indicate greater transparency.

### What are the details?

The protecting minority investors indicators reported here for Bulgaria are based on detailed information collected through a survey of corporate and securities lawyers about securities regulations, company laws and court rules of evidence and procedure. To construct the six indicators on minority investor protection, scores are assigned to each based on a range of conditions relating

to disclosure, director liability, shareholder suits, shareholder rights, governance structure and corporate transparency in a standard case study (for more details, see the Data Notes section of the *Doing Business 2015* report). The summary below shows the details underlying the scores for Bulgaria.

Table 7.2 Summary of scoring for the protecting minority investors indicators in Bulgaria

	Answer	Score

# **PAYING TAXES**

Taxes are essential. The level of tax rates needs to be carefully chosen—and needless complexity in tax rules avoided. Firms in economies that rank better on the ease of paying taxes in the *Doing Business* study tend to perceive both tax rates and tax administration as less of an obstacle to business according to the World Bank Enterprise Survey research.

#### What do the indicators cover?

Using a case scenario, Doing Business measures the taxes and mandatory contributions that a mediumsize company must pay in a given year as well as the administrative burden of paying taxes and contributions. This case scenario uses a set of financial statements and assumptions about transactions made over the year. Information is also compiled on the frequency of filing and payments as well as time taken to comply with tax laws. The ranking of economies on the ease of paying taxes is determined by sorting their distance to frontier scores on the ease of paying taxes. These scores are the simple average of the distance to frontier scores for each of the component indicators, with a threshold and a nonlinear transformation applied to one of the component indicators, the total tax rate<sup>5</sup>. The financial statement variables have been updated to be proportional to 2012 income per capita; previously they were proportional to 2005 income per capita. To make the data comparable across economies, several assumptions are used.

- TaxpayerCo is a medium-size business that started operations on January 1, 2012.
- The business starts from the same financial

# WHAT THE PAYING TAXES INDICATORS MEASURE

# Tax payments for a manufacturing company in 2013 (number per year adjusted for electronic and joint filing and payment)

Total number of taxes and contributions paid, including consumption taxes (value added tax, sales tax or goods and service tax)

Method and frequency of filing and payment

# Time required to comply with 3 major taxes (hours per year)

Collecting information and computing the tax payable

Completing tax return forms, filing with proper agencies

Arranging payment or withholding

Preparing separate tax accounting books, if required

#### **Total tax rate (% of profit before all taxes)**

Profit or corporate income tax

Social contributions and labor taxes paid by the employer

Property and property transfer taxes

Dividend, capital gains and financial transactions taxes

Waste collection, vehicle, road and other taxes

 Taxes and mandatory contributions include corporate income tax, turnover tax and all

The nonlinear distance to frontier for the total tax rate is equal to the distance that particular action as paid by the threshold is defined as the total tax rate is equal to the distance that particular actions are the total tax rate is equal to the distance that particular actions are the total tax rate is equal to the distance that particular actions are threshold is defined as the total tax rate is equal to the distance that particular actions are that minimizes distortions or maximizes efficiency in the tax system of an economy overall. Instead, it is mainly empirical in nature, set at the distance of the control of the particular and manufacturing sector as observed through the paying taxes in the manufacturing sector as observed through the paying taxes in the manufacturing sector as observed through the paying taxes in the manufacturing or from natural resources (all of which are outside the scope of the methodology). This year's threshold is 26.1%.

### **PAYING TAXES**

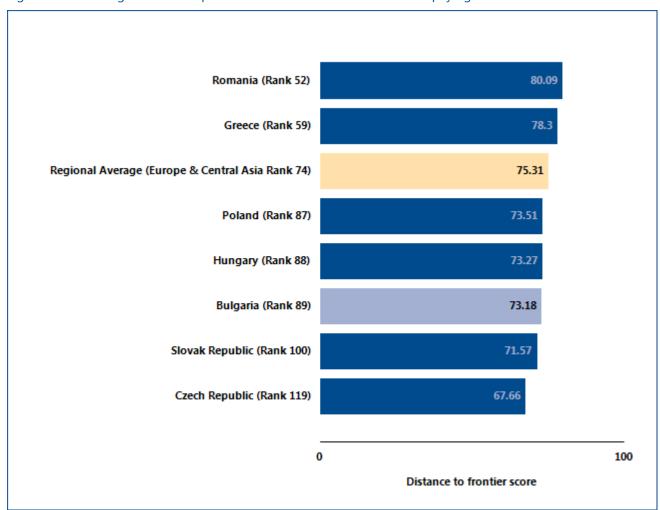

# Where does the economy stand today?

What is the administrative burden of complying with taxes in Bulgaria—and how much do firms pay in taxes? On average, firms make 13.0 tax payments a year, spend 454.0 hours a year filing, preparing and paying taxes and pay total taxes amounting to 27.0% of profit (see the summary at the end of this chapter for details). Most indicator sets refer to a case scenario in the largest business city of an economy, except for 11 economies for which the data are a population-weighted average of the

2 largest business cities. See the chapter on distance to frontier and ease of doing business ranking at the end of this profile for more details.

Globally, Bulgaria stands at 89 in the ranking of 189 economies on the ease of paying taxes (figure 8.1). The rankings for comparator economies and the regional average ranking provide other useful information for assessing the tax compliance burden for businesses in Bulgaria.

Figure 8.1 How Bulgaria and comparator economies rank on the ease of paying taxes

### **PAYING TAXES**

Economies around the world have made paying taxes faster and easier for businesses—such as by consolidating filings, reducing the frequency of payments or offering electronic filing and payment. Many have lowered tax rates. Changes have brought

concrete results. Some economies simplifying tax payment and reducing rates have seen tax revenue rise. What tax reforms has *Doing Business* recorded in Bulgaria (table 8.1)?

Table 8.1 How has Bulgaria made paying taxes easier—or not? By *Doing Business* report year from DB2010 to DB2015

DB year	Reform
DB2011	Bulgaria reduced employer contribution rates for social security.

Note: For information on reforms in earlier years (back to DB2006), see the *Doing Business* reports for these years, available at http://www.doingbusiness.org.

#### **PAYING TAXES**

### What are the details?

The indicators reported here for Bulgaria are based on the taxes and contributions that would be paid by a standardized case study company used by *Doing Business* in collecting the data (see the section in this chapter on what the indicators cover). Tax practitioners are asked to review a set of financial statements as well as a standardized list of assumptions and transactions that the company completed during its 2nd year of operation. Respondents are asked how much taxes and mandatory contributions the business must pay and how these taxes are filed and paid.

#### **LOCATION OF STANDARDIZED COMPANY**

**City: Sofia** 

The taxes and contributions paid are listed in the summary below, along with the associated number of payments, time and tax rate.

Table 8.2 Summary of tax rates and administration

Tax or mandatory contribution	Payments (number)	Notes on payments	Time (hours)	Statutory tax rate	Tax base	Total tax rate (% of profit)	Notes on total tax rate
Social security contributions	1	online filing	256	17.8%- 18.5%	gross salaries	20.2	
Corporate income tax	1	online filing	33	10%	taxable income	5	
Fees for municipal services (garbage collection fee) - Sofia	4		0	BGN1340+ 0.34%	tax value of land and building	0.7	
Stamp duty on property transfer	1		0	notary fees of BGN 6,000 and 0.1% of sales price	higher of tax value and agreed value of real estate	0.5	
Real estate tax on the land and building	1		0	0.1875%	tax value of land and building	0.3	
Vignette	1		0	BGN 1300	type of vehicle	0.2	
Vehicle tax	1		0	BGN 296	per truck	0	

Tax or mandatory contribution	Payments (number)	Notes on payments	Time (hours)	Statutory tax rate	Tax base	Total tax rate (% of profit)	Notes on total tax rate
Fuel tax	1		0		included in the price of fuel	0	small amount
Employee paid - Social security contributions	0	paid jointly	0	12.9%	gross salaries	0	withheld
Value added tax (VAT)	1	online filing	165	20%	value added	0	not included
Final/one-off tax on certain expenses	1	online filing	0	10%	gross expenses	0	small amount
Totals	13.0		454.0			27.0	

In today's globalized world, making trade between economies easier is increasingly important for business. Excessive document requirements, burdensome customs procedures, inefficient port operations and inadequate infrastructure all lead to extra costs and delays for exporters and importers, stifling trade potential. Research shows that exporters in developing countries gain more from a 10% drop in their trading costs than from a similar reduction in the tariffs applied to their products in global markets.

#### What do the indicators cover?

Doing Business measures the time and cost (excluding tariffs and the time and cost for sea transport) associated with exporting and importing a standard shipment of goods by sea transport, and the number of documents necessary to complete the transaction. The indicators cover predefined stages such as documentation requirements and procedures at customs and other regulatory agencies as well as at the port. They also cover trade logistics, including the time and cost of inland transport to the largest business city. The ranking of economies on the ease of trading across borders is determined by sorting their distance to frontier scores for trading across borders. These scores are the simple average of the distance to frontier scores for each of the component indicators. To make the data comparable across economies, Doing Business uses several assumptions about the business and the traded goods.

#### The business:

- Is located in the economy's largest business city. For the 11 economies with a population of more than 100 million, data for a second city have been added.
- Is a private, limited liability company, domestically owned and does not operate with special export or import privileges.
- Conducts export and import activities, but does not have any special accreditation such as an authorized economic operator status.

# WHAT THE TRADING ACROSS BORDERS INDICATORS MEASURE

# **Documents required to export and import** (number)

Bank documents

Customs clearance documents

Port and terminal handling documents

Transport documents

#### Time required to export and import (days)

Obtaining, filling out and submitting all the documents

Inland transport and handling

Customs clearance and inspections

Port and terminal handling

Does not include sea transport time

# Cost required to export and import (US\$ per container)

All documentation

Inland transport and handling

Customs clearance and inspections

Port and terminal handling

Official costs only, no bribes

#### The traded product:

- Is not hazardous nor includes military items.
- Does not require refrigeration or any other special environment.
- Do not require any special phytosanitary or environmental safety standards other than accepted international standards.
- Is one of the economy's leading export or import products.
- Is transported in a dry-cargo, 20-foot full container load.

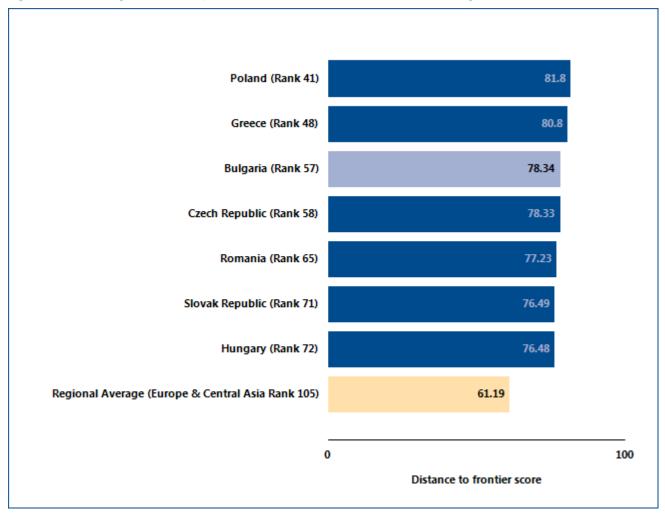

# Where does the economy stand today?

What does it take to export or import in Bulgaria? According to data collected by *Doing Business*, exporting a standard container of goods requires 4 documents, takes 18.0 days and costs \$1375.0. Importing the same container of goods requires 5 documents, takes 17.0 days and costs \$1365.0 (see the summary of four predefined stages and documents at the end of this chapter for details). Most indicator sets refer to a case scenario in the largest business city of an economy, except for 11 economies for which the data are a

population-weighted average of the 2 largest business cities. See the chapter on distance to frontier and ease of doing business ranking at the end of this profile for more details.

Globally, Bulgaria stands at 57 in the ranking of 189 economies on the ease of trading across borders (figure 9.1). The rankings for comparator economies and the regional average ranking provide other useful information for assessing how easy it is for a business in Bulgaria to export and import goods.

Figure 9.1 How Bulgaria and comparator economies rank on the ease of trading across borders

In economies around the world, trading across borders as measured by *Doing Business* has become faster and easier over the years. Governments have introduced tools to facilitate trade—including single windows, risk-based inspections and electronic data interchange

systems. These changes help improve the trading environment and boost firms' international competitiveness. What trade reforms has *Doing Business* recorded in Bulgaria (table 9.1)?

Table 9.1 How has Bulgaria made trading across borders easier—or not? By *Doing Business* report year from DB2010 to DB2015

DB year	Reform
DB2012	Bulgaria made trading across borders faster by introducing online submission of customs declaration forms.

Note: For information on reforms in earlier years (back to DB2006), see the *Doing Business* reports for these years, available at http://www.doingbusiness.org.

Source: Doing Business database.

### What are the details?

The indicators reported here for Bulgaria are based on a set of specific predefined stages for trading a standard shipment of goods by ocean transport (see the section in this chapter on what the indicators cover). Information on the required documents and the time and cost to complete export and import is collected from local freight forwarders, shipping lines, customs brokers, port officials and banks.

#### **LOCATION OF STANDARDIZED COMPANY**

**Port Name: Varna** 

**City: Sofia** 

The predefined stages, and the associated time and cost, for exporting and importing a standard shipment of goods are listed in the summary below, along with the required documents.

Table 9.2 Summary of predefined stages and documents for trading across borders in Bulgaria

Stages to export	Time (days)	Cost (US\$)
Customs clearance and inspections	2	50
Documents preparation	10	200
Inland transportation and handling	2	880
Ports and terminal handling	4	245
Totals	18	1,375

Stages to import	Time (days)	Cost (US\$)
Customs clearance and inspections	2	70
Documents preparation	9	150
Inland transportation and handling	2	900
Ports and terminal handling	4	245
Totals	17	1,365

# Documents to export

Bill of lading

Commercial invoice

Customs export declaration

Packing list

# **Documents to import**

Bill of lading

Cargo release order

Commercial invoice

Customs import declaration

Packing list

# **ENFORCING CONTRACTS**

Effective commercial dispute resolution has many benefits. Courts are essential for entrepreneurs because they interpret the rules of the market and protect economic rights. Efficient and transparent courts encourage new business relationships because businesses know they can rely on the courts if a new customer fails to pay. Speedy trials are essential for small enterprises, which may lack the resources to stay in business while awaiting the outcome of a long court dispute.

#### What do the indicators cover?

Doing Business measures the efficiency of the judicial system in resolving a commercial dispute before local courts. Following the step-by-step evolution of a standardized case study, it collects data relating to the time, cost and procedural complexity of resolving a commercial lawsuit. The ranking on the ease of enforcing contracts is the simple average of the percentile rankings on its component indicators: procedures, time and cost.

The dispute in the case study involves the breach of a sales contract between 2 domestic businesses. The case study assumes that the court hears an expert on the quality of the goods in dispute. This distinguishes the case from simple debt enforcement. To make the data comparable across economies, *Doing Business* uses several assumptions about the case:

- The seller and buyer are located in the economy's largest business city. For the 11 economies with a population of more than 100 million, data for a second city have been added.
- The buyer orders custom-made goods, then fails to pay.
- The seller sues the buyer before a competent court.
- The value of the claim is 200% of the income per capita or the equivalent in local currency of USD 5,000, whichever is greater.

# WHAT THE ENFORCING CONTRACTS INDICATORS MEASURE

# Procedures to enforce a contract through the courts (number)

Steps to file and serve the case Steps for trial and judgment Steps to enforce the judgment

# Time required to complete procedures (calendar days)

Time to file and serve the case

Time for trial and obtaining judgment

Time to enforce the judgment

# Cost required to complete procedures (% of claim)

Average attorney fees
Court costs

**Enforcement costs** 

- The seller requests a pretrial attachment to secure the claim.
- The dispute on the quality of the goods requires an expert opinion.
- The judge decides in favor of the seller; there is no appeal.
- The seller enforces the judgment through a public sale of the buyer's movable assets.

#### **ENFORCING CONTRACTS**

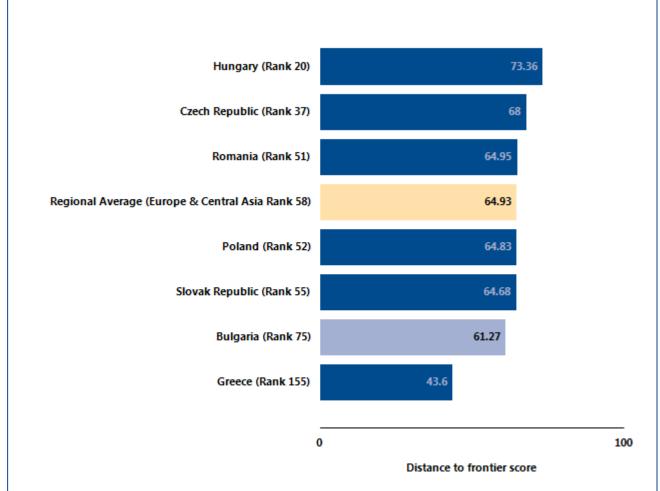

## Where does the economy stand today?

How efficient is the process of resolving a commercial dispute through the courts in Bulgaria? According to data collected by Doing Business, contract enforcement takes 564.0 days, costs 23.8% of the value of the claim and requires 38.0 procedures (see the summary at the end of this chapter for details). Most indicator sets refer to a case scenario in the largest business city of an economy, except for 11 economies for which the data are a population-weighted average of the 2 largest

business cities. See the chapter on distance to frontier and ease of doing business ranking at the end of this profile for more details.

Globally, Bulgaria stands at 75 in the ranking of 189 economies on the ease of enforcing contracts (figure 10.1). The rankings for comparator economies and the regional average ranking provide other useful benchmarks for assessing the efficiency of contract enforcement in Bulgaria.

Figure 10.1 How Bulgaria and comparator economies rank on the ease of enforcing contracts

### **ENFORCING CONTRACTS**

#### What are the details?

The indicators reported here for Bulgaria are based on a set of specific procedural steps required to resolve a standardized commercial dispute through the courts (see the section in this chapter on what the indicators cover). These procedures, and the time and cost of completing them, are identified through study of the codes of civil procedure and other court regulations, as well as through questionnaires completed by local litigation lawyers (and, in a quarter of the economies covered by *Doing Business*, by judges as well).

COURT NAME	
Claim value:	BGN 20,531
Court name:	Sofia District Court
City:	Sofia

Table 10.2 Summary of time, cost and procedures for enforcing a contract in Bulgaria

Indicator	Bulgaria	Europe & Central Asia average
Time (days)	564	448
Filing and service	105	
Trial and judgment	334	
Enforcement of judgment	125	
Cost (% of claim)	23.8	25.2
Attorney cost (% of claim)	10.0	
Court cost (% of claim)	5.6	
Enforcement Cost (% of claim)	8.2	
Procedures (number)	38	37
Number of procedures (without bonus points)	38	
Total number of procedures (including bonus points)	38	

No.	Procedures
	Filing and service:
1	Plaintiff requests payment: Plaintiff or his lawyer asks Defendant orally or in writing to comply with the contract.
2	Plaintiff hires a lawyer: Plaintiff hires a lawyer.
*	Plaintiff files a summons and complaint: Plaintiff files a summons and complaint with the court (orally or in writing).
*	Plaintiff pays court fees: Plaintiff pays court fees (e.g. court duties, stamp duties, or any other type of court fees). Answer 'yes' even if Plaintiff recovers these costs.
3	Registration of court case: Registration of court case by the court administration (this can include assigning a reference number to the case).
*	Assignment of court case to a judge: Assignment of court case to a judge (through a random procedure, automated system, ruling of an administrative judge, court officer, etc).
4	Judicial scrutiny of summons and complaint: Judge examines Plaintiff's summons and complaint for formal requirements as a matter of law or standard practice.
*	Judge admits summons and complaint: Judge admits summons and complaint (after verifying the formal requirements).
5	Delivery of summons and complaint to person authorized to perform service of process on Defendant: The judge or a court officer delivers the summons to a summoning office, officer, or authorized person (including Plaintiff), for service of process on Defendant.
*	Arrangements for physical delivery of summons and complaint: Plaintiff takes the necessary steps to arrange for physical service of process on Defendant (e.g. instructing a court officer or a private bailiff).
*	Mailing of summons and complaint: Court or process server, including (private) bailiff, mails summons and complaint to Defendant.
6	Attempt at physical delivery: An attempt to physically deliver summons and complaint to Defendant is made.
*	Application for pre-judgment attachment: Plaintiff submits an application in writing for the attachment of Defendant's property prior to judgment.
*	Decision on pre-judgment attachment: Judge decides whether to grant Plaintiff's request for pre-judgment attachment of Defendant's property and notifies Plaintiff and Defendant of the decision.
7	Guarantees securing attached property: Plaintiff submits guarantees or bonds to secure Defendant against possible damages to attached property.
8	Pre-judgment attachment order: Defendant's property is attached prior to judgment. Attachment order either involves physical attachment, or is achieved by freezing, registering, marking, or otherwise separating and restricting Defendant's movement of specific moveable assets.
	Trial and judgment:

No.	Procedures
9	Defendant files an answer to Plaintiff's claim: Defendant files a written pleading which includes his answer or defense on the merits of the case (see assumption 4).
*	Court appointment of independent expert: Judge appoints, either at the parties' request or at his own initiative, an independent expert to decide whether the quality of the goods Plaintiff delivered to Defendant is adequate. (see assumption 5-b).
10	Notification of court-appointment of independent expert: The court notifies both parties that the court is appointing an independent expert (see assumption 5-b).
*	Delivery of expert report by court-appointed expert: The independent expert, appointed by the court, delivers his or her expert report to the court (see assumption 5-b).
*	Setting of date(s) for oral hearing or trial: Judge sets the date(s) for the oral hearing or trial.
11	Summoning of (expert) witnesses: The court summons (expert) witnesses to appear in court for the oral hearing or trial (see assumption 5-a).
12	Adjournments: Court proceedings are delayed because one or both parties request and obtain an adjournment to prepare for the oral hearing or trial as a matter of common practice.
13	Oral hearing (prevalent in civil law): The parties argue the merits of the case at an oral hearing before the judge. Witnesses and a court-appointed independent expert may be heard and questioned at the oral hearing.
*	Final arguments: The parties present their final factual and legal arguments to the court either by oral presentation or by a written submission.
14	Judgment date: The judge sets a date for delivery of the judgment.
15	Notification of judgment in court: The parties are notified of the judgment at a court hearing.
16	Writing of judgment: The judge produces a written copy of the judgment.
17	Registration of judgment: The court office registers the judgment after receiving a written copy of the judgment.
18	Court notification of availability of the written judgment: The court notifies the parties that the written judgment is available at the courthouse.
19	Plaintiff receives a copy of the judgment: Plaintiff receives a copy of the written judgment which is 100% in favor of Plaintiff (see assumption 6).
20	Defendant is formally notified of the judgment: Plaintiff or court formally notifies the Defendant of the judgment. The appeal period starts to run from the day the Defendant is formally notified of the judgment.
21	Appeal period: By law Defendant has the opportunity to appeal the judgment during a specified period. Defendant decides not to appeal. Seller decides to start enforcing the judgment when the appeal period ends (see assumption 8).
22	Order for reimbursement by Defendant of Plaintiff's court fees: The judgment orders Defendant to reimburse Plaintiff for the court fees Plaintiff has advanced, because Defendant has lost the case.
	Enforcement of judgment:

No.	Procedures
*	Plaintiff hires a lawyer: Plaintiff hires a lawyer to enforce the judgment or continues to be represented by a lawyer during the enforcement of judgment phase.
23	Plaintiff retains an enforcement agent to enforce the judgment.: Plaintiff retains the services of a court enforcement officer such as a court bailiff or sheriff, or a private bailiff.
*	Plaintiff requests an enforcement order: Plaintiff applies to the court to obtain the enforcement order ('seal' on judgment).
24	Plaintiff advances enforcement fees: Plaintiff pays the fees related to the enforcement of the judgment.
25	Attachment of enforcement order to judgment: The judge attaches the enforcement order ('seal') to the judgment.
*	Delivery of enforcement order: The court's enforcement order is delivered to a court enforcement officer or a private bailiff.
26	Request to Defendant to comply voluntarily with judgment: Plaintiff, a court enforcement officer or a private bailiff requests Defendant to voluntarily comply with the judgment.
27	Identification of Defendant's assets by court official or Defendant for purposes of enforcement: The judge, a court enforcement officer, a private bailiff or the Defendant himself identifies Defendant's movable assets for the purposes of enforcing the judgment through a sale of Defendant's assets.
28	Contestation of selection of assets identified for sale: A party, Plaintiff or Defendant, which was not involved in the designation of the assets for attachment, contests the selection of assets for enforcement of judgment through a sale.
29	Creditor notification of intent to attach: A court enforcement officer or private bailiff notifies other creditors of the intent to attach Defendant's goods.
30	Attachment: Defendant's movable goods are attached (physically or by registering, marking or separating assets).
31	Valuation or appraisal of attached movable goods: The court or court-appointed valuation expert evaluates the attached goods.
32	Enforcement disputes before court: The enforcement of the judgment is delayed because Defendant opposes aspects of the enforcement process before the judge.
33	Call for public auction: Judge calls a public auction by, for example, advertising or publication in the newspapers.
34	Sale through public auction: The Defendant's movable property is sold at public auction.
35	Judge's decision on bids: Judge determines the adequacy of the bids presented at public auction.
36	Distribution of proceeds: The proceeds of the public auction are distributed to Plaintiff (and, where applicable, to other creditors, according to the rules of priority).
37	Reimbursement of Plaintiff's enforcement fees: Defendant reimburses Plaintiff's enforcement fees which Plaintiff had advanced previously.
38	Payment: Court orders that the proceeds of the public auction or the direct sale be delivered to Plaintiff.

<sup>\*</sup> Not counted in the total number of procedures. *Source: Doing Business* database.

### RESOLVING INSOLVENCY

A robust bankruptcy system functions as a filter, ensuring the survival of economically efficient companies and reallocating the resources of inefficient ones. Fast and cheap insolvency proceedings result in the speedy return of businesses to normal operation and increase returns to creditors. By improving the expectations of creditors and debtors about the outcome of insolvency proceedings, well-functioning insolvency systems can facilitate access to finance, save more viable businesses and thereby improve growth and sustainability in the economy overall.

#### What do the indicators cover?

Doing Business studies the time, cost and outcome of insolvency proceedings involving domestic legal entities. These variables are used to calculate the recovery rate, which is recorded as cents on the dollar recouped by secured creditors through reorganization, liquidation or debt enforcement (foreclosure) proceedings. To determine the present value of the amount recovered by creditors, *Doing Business* uses the lending rates from the International Monetary Fund, supplemented with data from central banks and the Economist Intelligence Unit.

In addition, *Doing Business* evaluates the adequacy and integrity of the existing legal framework applicable to liquidation and reorganization proceedings through the strength of insolvency framework index. The index tests whether economies adopted internationally accepted good practices in four areas: commencement of proceedings, management of debtor's assets, reorganization proceedings and creditor participation.

The ranking of the Resolving Insolvency indicator is based on the recovery rate and the total score of the strength of insolvency framework index. The Resolving Insolvency indicator does not measure insolvency proceedings of individuals and financial institutions. The data are derived from survey responses by local insolvency practitioners and verified through a study of laws and regulations as well as public information on bankruptcy systems.

# WHAT THE RESOLVING INSOLVENCY INDICATORS MEASURE

#### Time required to recover debt (years)

Measured in calendar years

Appeals and requests for extension are included

## Cost required to recover debt (% of debtor's estate)

Measured as percentage of estate value

Court fees

Fees of insolvency administrators

Lawyers' fees

Assessors' and auctioneers' fees

Other related fees

#### **Outcome**

Whether business continues operating as a going concern or business assets are sold piecemeal

#### **Recovery rate for creditors**

Measures the cents on the dollar recovered by secured creditors

Outcome for the business (survival or not) determines the maximum value that can be recovered

Official costs of the insolvency proceedings are deducted

Depreciation of furniture is taken into account

Present value of debt recovered

## Strength of insolvency framework index (0-16)

Sum of the scores of four component indices:

Commencement of proceedings index (0-3)

Management of debtor's assets index (0-6)

Reorganization proceedings index (0-3)

Creditor participation index (0-4)

#### **RESOLVING INSOLVENCY**

## Where does the economy stand today?

Combination of quality regulations and efficient practice characterize the top-performing economies. How efficient are insolvency proceedings in Bulgaria? According to data collected by *Doing Business*, resolving insolvency takes 3.3 years on average and costs 9.0% of the debtor's estate, with the most likely outcome being that the company will be sold as piecemeal sale. The average recovery rate is 33.2 cents on the dollar. Most indicator sets refer to a case scenario in the largest business city of an economy, except for 11 economies for which the data are a population-weighted average of the 2 largest business cities. See the chapter on distance to frontier and ease of doing business ranking at the end of this profile for more details.

According to data collected by *Doing Business*, Bulgaria scores 2.5 out of 3 points on the commencement of proceedings index, 6.0 out of 6 points on the management of debtor's assets index, 2.5 out of 3 points on the reorganization proceedings index, and 4.0 out of 4 points on the creditor participation index. Bulgaria's total score on the strength of insolvency framework index is 15.0 out of 16.

Globally, Bulgaria stands at 38 in the ranking of 189 economies on the ease of resolving insolvency (figure 11.1). The rankings for comparator economies and the regional average ranking provide other useful benchmarks for assessing the efficiency of insolvency proceedings in Bulgaria.

Figure 11.1 How Bulgaria and comparator economies rank on the ease of resolving insolvency

Figure 11.3 Strength of insolvency framework index (0-16) - Bulgaria

#### **RESOLVING INSOLVENCY**

A well-balanced bankruptcy system distinguishes companies that are financially distressed but economically viable from inefficient companies that should be liquidated. But in some insolvency systems even viable businesses are liquidated. This is starting to

change. Many recent reforms of bankruptcy laws have been aimed at helping more of the viable businesses survive. What insolvency reforms has *Doing Business* recorded in Bulgaria (table 11.1)?

Table 11.1 How has Bulgaria made resolving insolvency easier—or not?

By Doing Business report year from DB2010 to DB2015

DB year	Reform
DB2012	Bulgaria amended its commerce act to extend further rights to secured creditors and increase the transparency of insolvency proceedings.

*Note:* For information on reforms in earlier years (back to DB2005), see the *Doing Business* reports for these years, available at http://www.doingbusiness.org. *Source: Doing Business* database.

Doing Business measures flexibility in the regulation of employment, specifically as it affects the hiring and redundancy of workers and the rigidity of working hours. This year, for the first time, the indicators measuring flexibility in labor market regulations focus on those affecting the food retail industry, using a standardized case study of a cashier in a supermarket. Also new is that Doing Business collects data on regulations applying to employees hired through temporary-work agencies as well as on those applying to permanent employees or employees hired on fixed-term contracts. The indicators also cover additional areas of labor market regulation, including social protection schemes and benefits as well as labor disputes.

Over the period from 2007 to 2011 improvements were made to align the methodology for the labor market regulation indicators (formerly the employing workers indicators) with the letter and spirit of the International Labour Organization (ILO) conventions. Only 6 of the 188 ILO conventions cover areas measured by Doing Business: employee termination, weekend work, holiday with pay, night work, protection against unemployment and medical care and sickness benefits. The Doing Business methodology is fully consistent with these 6 conventions. The ILO conventions covering areas related to the labor market regulation indicators do not include the ILO core labor standards—8 conventions covering the right to collective bargaining, the elimination of forced labor, the abolition of child labor and equitable treatment in employment practices.

Between 2009 and 2011 the World Bank Group worked with a consultative group—including labor lawyers, employer and employee representatives, and experts from the ILO, the Organisation for Economic Cooperation and Development (OECD), civil society and the private sector—to review the methodology for the labor market regulation indicators and explore future areas of research.

A full report with the conclusions of the consultative group is available at:

http://www.doingbusiness.org/methodology/employing-workers.

Doing Business 2015 presents the data for the labor market regulation indicators in an annex. The report does not present rankings of economies on these indicators nor include the topic in the aggregate distance to frontier score or ranking on the ease of doing business. Detailed data collected on labor market regulations are available on the Doing Business website (http://www.doingbusiness.org). The data on labor market regulations are based on a detailed survey of employment regulations that is completed by local lawyers and public officials. Employment laws and regulations as well as secondary sources are reviewed to ensure accuracy. To make the data comparable across economies, several assumptions about the worker and the business are used.

#### The worker:

- Is a cashier in a supermarket or a grocery store
- Is a full-time employee
- Is not a member of the labor union, unless membership is mandatory

#### The business:

- Is a limited liability company (or the equivalent in the economy) with 60 employees.
- Operates a supermarket or grocery store in the economy's largest business city. For 11 economies the data are also collected for the second largest business city.
- Is subject to collective bargaining agreements if such agreements cover more than 50% of the food retail sector and they apply even to firms that are not party to them.
- Abides by every law and regulation but does not grant workers more benefits than those mandated by law, regulation or (if applicable) collective bargaining agreements.

#### What are the details?

The data reported here for Bulgaria are based on a detailed survey of labor market regulation that is completed by local lawyers and public officials. Employment laws and regulations as well as secondary sources are reviewed to ensure accuracy.

#### Difficulty of hiring index

Difficulty of hiring covers 4 areas: (i) whether fixed-term contracts are prohibited for permanent tasks; (ii) the maximum cumulative duration of fixed-term contracts; (iii) the minimum wage for a cashier, age 19, with 1 year of work experience; and (iv) the ratio of the minimum

wage to the average value added per worker. The average value added per worker is the ratio of an economy's GNI per capita to the working-age population as a percentage of the total population.

Difficulty of hiring index	Data
Fixed-term contracts prohibited for permanent tasks?	No
Maximum length of a single fixed-term contract (months)	36 - Art. 68 of the Labour Code
Maximum length of fixed-term contracts, including renewals (months)	36
Minimum wage applicable to the worker assumed in the case study (US\$/month)	233.18
Ratio of minimum wage to value added per worker	0.27

### Rigidity of hours index

Rigidity of hours covers 7 areas: (i) whether the workweek can extend to 50 hours or more (including overtime) for 2 months in a year to respond to a seasonal increase in workload; (ii) the maximum number of days allowed in the workweek; (iii) the premium for night work (as a percentage of hourly pay); (iv) the

premium for work on a weekly rest day (as a percentage of hourly pay); (v) whether there are restrictions on night work; (vi) whether there are restrictions on weekly holiday work; and (vii) the average paid annual leave for workers with 1 year of tenure, 5 years of tenure and 10 years

of tenure.

Rigidity of hours index	Data
50-hour workweek allowed for 2 months a year in case of a seasonal increase in workload?	Yes
Maximum working days per week	6.0
Premium for night work (% of hourly pay)	3%
Premium for work on weekly rest day (% of hourly pay)	0%
Major restrictions on night work?	Yes
Major restrictions on weekly holiday?	No
Paid annual leave for a worker with 1 year of tenure (in working days)	20.0
Paid annual leave for a worker with 5 years of tenure (in working days)	20.0
Paid annual leave for a worker with 10 years of tenure (in working days)	20.0
Paid annual leave (average for workers with 1, 5 and 10 years of tenure, in working days)	20.0

#### Difficulty of redundancy index

Difficulty of redundancy index looks at 9 questions: (i) what the length is in months of the maximum probationary period; (ii) whether redundancy is disallowed as a basis for terminating workers; (iii) whether the employer needs to notify a third party (such as a government agency) to terminate 1 redundant worker; (iv) whether the employer needs to notify a third party to terminate a group of 9 redundant workers; (v)

whether the employer needs approval from a third party to terminate 1 redundant worker; (vi) whether the employer needs approval from a third party to terminate a group of 9 redundant workers; (vii) whether the law requires the employer to reassign or retrain a worker before making the worker redundant; (viii) whether priority rules apply for redundancies; and (ix) whether priority rules apply for reemployment.

Difficulty of redundancy index	Data
Maximum length of probationary period (months)	6.0
Dismissal due to redundancy allowed by law?	Yes
Third-party notification if 1 worker is dismissed?	No
Third-party approval if 1 worker is dismissed?	No
Third-party notification if 9 workers are dismissed?	No
Third-party approval if 9 workers are dismissed?	No
Retraining or reassignment obligation before redundancy?	No
Priority rules for redundancies?	No
Priority rules for reemployment?	No

#### Redundancy cost

Redundancy cost measures the cost of advance notice requirements, severance payments and penalties due when terminating a redundant worker, expressed in weeks of salary. The average value of notice

requirements and severance payments applicable to a worker with 1 year of tenure, a worker with 5 years and a worker with 10 years is considered. One month is recorded as 4 and 1/3 weeks.

Redundancy cost indicator (in salary weeks)	Data
Notice period for redundancy dismissal for a worker with 1 year of tenure	4.3
Notice period for redundancy dismissal for a worker with 5 years of tenure	4.3
Notice period for redundancy dismissal for a worker with 10 years of tenure	4.3
Notice period for redundancy dismissal (average for workers with 1, 5 and 10 years of tenure)	4.3
Severance pay for redundancy dismissal for a worker with 1 year of tenure	4.3
Severance pay for redundancy dismissal for a worker with 5 years of tenure	4.3
Severance pay for redundancy dismissal for a worker with 10 years of tenure	4.3
Severance pay for redundancy dismissal (average for workers with 1, 5 and 10 years of tenure)	4.3

Source: Doing Business database.

#### Social protection schemes and benefits & Labor disputes

Doing Business collects data on the existence of unemployment protection schemes as well as data on whether employers are legally required to provide health insurance for employees with permanent contracts.

Doing Business also assesses the mechanisms available to resolve labor disputes. More specifically, it collects data on what courts would be competent to hear labor disputes and whether the competent court is specialized in resolving labor disputes.

Social protection schemes and benefits & Labor disputes indicator	Data
Availability of unemployment protection scheme?	Yes
Health insurance existing for permanent employees?	Yes
Availability of courts or court sections specializing in labor disputes?	No

## DISTANCE TO FRONTIER AND EASE OF DOING BUSINESS RANKING

This year's report presents results for 2 aggregate measures: the distance to frontier score and the ease of doing business ranking, which for the first time this year is based on the distance to frontier score. The ease of doing business ranking compares economies with one another; the distance to frontier score benchmarks economies with respect to regulatory best practice, showing the absolute distance to the best performance on each *Doing Business* indicator. When compared across years, the distance to frontier score shows how much the regulatory environment for local entrepreneurs in an economy has changed over time in absolute terms, while the ease of doing business ranking can show only how much the regulatory environment has changed relative to that in other economies.

#### Distance to Frontier

The distance to frontier score captures the gap between an economy's performance and a measure of best practice across the entire sample of 31 indicators for 10 *Doing Business* topics (the labor market regulation indicators are excluded). For starting a business, for example, Canada and New Zealand have the smallest number of procedures required (1), and New Zealand the shortest time to fulfill them (0.5 days). Slovenia has the lowest cost (0.0), and Australia, Colombia and 110 other economies have no paid-in minimum capital requirement (table 15.1 in the *Doing Business 2015* report).

#### Calculation of the distance to frontier score

Calculating the distance to frontier score for each economy involves 2 main steps. First, individual component indicators are normalized to a common unit where each of the 31 component indicators y (except for the total tax rate) is rescaled using the linear transformation (worst – y)/(worst – frontier). In this formulation the frontier represents the best performance on the indicator across all economies since 2005 or the third year after data for the indicator were collected for the first time. For legal indicators such as those on getting credit or protecting minority investors, the frontier is set at the highest possible value. For the total tax rate, consistent with the use of a threshold in calculating the rankings on this indicator, the frontier is

defined as the total tax rate at the 15th percentile of the overall distribution for all years included in the analysis. For the time to pay taxes the frontier is defined as the lowest time recorded among all economies that levy the 3 major taxes: profit tax, labor taxes and mandatory contributions, and value added tax (VAT) or sales tax. In addition, the cost to export and cost to import for each year are divided by the GDP deflator, to take the general price level into account when benchmarking these absolute-cost indicators across economies with different inflation trends. The base year for the deflator is 2013 for all economies.

In the same formulation, to mitigate the effects of extreme outliers in the distributions of the rescaled data for most component indicators (very few economies need 700 days to complete the procedures to start a business, but many need 9 days), the worst performance is calculated after the removal of outliers. The definition of outliers is based on the distribution for each component indicator. To simplify the process, 2 rules were defined: the 95th percentile is used for the indicators with the most dispersed distributions (including time, cost, minimum capital and number of payments to pay taxes), and the 99th percentile is used for number of procedures and number of documents to trade. No outlier was removed for component indicators bound by definition or construction, including legal index scores (such as the depth of credit information index, extent of conflict of interest regulation index and strength of insolvency framework index) and the recovery rate (figure 15.1 in the Doing Business 2015 report).

Second, for each economy the scores obtained for individual indicators are aggregated through simple averaging into one distance to frontier score, first for each topic and then across all 10 topics: starting a business, dealing with construction permits, getting electricity, registering property, getting credit, protecting minority investors, paying taxes, trading across borders, enforcing contracts and resolving insolvency. More complex aggregation methods—such as principal components and unobserved components—yield a ranking nearly identical to the simple average used by *Doing Business*<sup>6</sup>. Thus *Doing Business* uses the simplest

<sup>&</sup>lt;sup>6</sup> See Djankov, Manraj and others (2005). Principal components and unobserved components methods yield a ranking nearly identical to

method: weighting all topics equally and, within each topic, giving equal weight to each of the topic components<sup>7</sup>.

An economy's distance to frontier score is indicated on a scale from 0 to 100, where 0 represents the worst performance and 100 the frontier. All distance to frontier calculations are based on a maximum of 5 decimals. However, indicator ranking calculations and the ease of doing business ranking calculations are based on 2 decimals. The difference between an economy's distance to frontier score in any previous year and its score in 2014 illustrates the extent to which the economy has closed the gap to the regulatory frontier over time. And in any given year the score measures how far an economy is from the best performance at that time.

#### Treatment of the total tax rate

This year, for the first time, the total tax rate component of the paying taxes indicator set enters the distance to frontier calculation in a different way than any other indicator. The distance to frontier score obtained for the total tax rate is transformed in a nonlinear fashion before it enters the distance to frontier score for paying taxes. As a result of the nonlinear transformation, an increase in the total tax rate has a smaller impact on the distance to frontier score for the total tax rate—and therefore on the distance to frontier score for paying taxes—for economies with a below-average total tax rate than it would have in the calculation done in previous years (line B is smaller than line A in figure 15.2 of the Doing Business 2015 report). And for economies with an extreme total tax rate (a rate that is very high relative to the average), an increase has a greater impact on both these distance to frontier scores than before (line D is bigger than line C in figure 15.2 of the Doing Business 2015 report).

The nonlinear transformation is not based on any economic theory of an "optimal tax rate" that minimizes distortions or maximizes efficiency in an economy's

that from the simple average method because both these methods assign roughly equal weights to the topics, since the pairwise correlations among indicators do not differ much. An alternative to the simple average method is to give different weights to the topics, depending on which are considered of more or less importance in the context of a specific economy.

overall tax system. Instead, it is mainly empirical in nature. The nonlinear transformation along with the threshold reduces the bias in the indicator toward economies that do not need to levy significant taxes on companies like the *Doing Business* standardized case study company because they raise public revenue in other ways—for example, through taxes on foreign companies, through taxes on sectors other than manufacturing or from natural resources (all of which are outside the scope of the methodology). In addition, it acknowledges the need of economies to collect taxes from firms.

## Calculation of scores for economies with 2 cities covered

For each of the 11 economies for which a second city was added in this year's report, the distance to frontier score is calculated as the population-weighted average of the distance to frontier scores for the 2 cities covered (table 12.1). This is done for the aggregate score, the scores for each topic and the scores for all the component indicators for each topic.

Table 12.1 Weights used in calculating the distance to frontier scores for economies with 2 cities covered

Economy	City	Weight (%)
Panaladash	Dhaka	78
Bangladesh	Chittagong	22
Brazil	São Paulo	61
Diazii	Rio de Janeiro	39
China	Shanghai	55
Cilila	Beijing	45
India	Mumbai	47
India	Delhi	53
Indonesia	Jakarta	78
Indonesia	Surabaya	22
lanan	Tokyo	65
Japan	Osaka	35
Mexico	Mexico City	83
Mexico	Monterrey	17
Nigoria	Lagos	77
Nigeria	Kano	23
Pakistan	Karachi	65
Fakistali	Lahore	35
Russian Federation	Moscow	70
Russian Federation	St. Petersburg	30
United States	New York	60
United States	Los Angeles	40

Source: United Nations, Department of Economic and Social Affairs, Population Division, World Urbanization Prospects, 2014 Revision. http://esa.un.org/unpd/wup/CD-ROM/Default.aspx.

<sup>&</sup>lt;sup>7</sup> For getting credit, indicators are weighted proportionally, according to their contribution to the total score, with a weight of 60% assigned to the strength of legal rights index and 40% to the depth of credit information index. Indicators for all other topics are assigned equal weights

## Economies that improved the most across 3 or more *Doing Business* topics in 2013/14

Doing Business 2015 uses a simple method to calculate which economies improved the ease of doing business the most. First, it selects the economies that in 2013/14 implemented regulatory reforms making it easier to do business in 3 or more of the 10 topics included in this year's aggregate distance to frontier score. Twenty-one economies meet this criterion: Azerbaijan; Benin; the Democratic Republic of Congo; Côte d'Ivoire; the Czech Republic; Greece; India; Ireland; Kazakhstan; Lithuania; the former Yugoslav Republic of Macedonia; Poland; Senegal; the Seychelles; Spain; Switzerland; Taiwan, China; Tajikistan; Togo; Trinidad and Tobago; and the United Arab Emirates. Second, Doing Business sorts these economies on the increase in their distance to frontier score from the previous year using comparable data.

Selecting the economies that implemented regulatory reforms in at least 3 topics and had the biggest improvements in their distance to frontier scores is intended to highlight economies with ongoing, broadbased reform programs. The improvement in the distance to frontier score is used to identify the top improvers because this allows a focus on the absolute improvement—in contrast with the relative improvement shown by a change in rankings—that economies have made in their regulatory environment for business.

## Ease of *Doing Business* ranking

The ease of doing business ranking ranges from 1 to 189. The ranking of economies is determined by sorting the aggregate distance to frontier scores, rounded to 2 decimals.

## RESOURCES ON THE DOING BUSINESS WEBSITE

#### **Current features**
